

EXHIBIT A

ENGINEERING STATEMENT

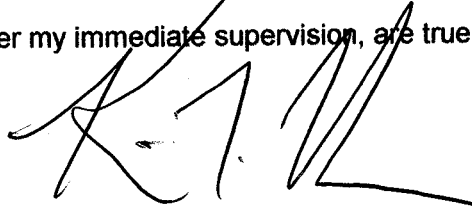

The engineering data contained herein have been prepared on behalf of FOX TELEVISION STATIONS, INC., licensee of WTXF-DT, Channel 42 in Philadelphia, Pennsylvania, in support of its Application for Construction Permit to correct site and height values for its currently licensed auxiliary facility. A reduction in effective radiated power from 305 kw to 150 kw is also proposed herein.

The authorized Andrew elliptically-polarized omnidirectional antenna is mounted at the 108-meter level of an existing 117-meter tower. Exhibit B provides elevation pattern data for the existing antenna. Exhibit C is a map upon which the predicted service contours of the currently authorized WTXF-DT facility and the proposed auxiliary facility are plotted. As shown, the auxiliary's 41 dBu contour is completely contained within that of WTXF-DT, as authorized. A power density calculation appears in Exhibit D.

It is not expected that the proposed facility would cause objectionable interference to any other broadcast or non-broadcast station authorized to operate at or near the WTXF-DT site. However, if such should occur, the owner of this station recognizes its obligation to take whatever corrective actions are necessary.

Since no change in overall height or location of the existing tower is proposed herein, the FAA has not been notified of this application. In addition, the FCC issued Antenna Structure Registration Number 1026546 to this tower.

I declare under penalty of perjury that the foregoing statements and the attached exhibits, which were prepared by me or under my immediate supervision, are true and correct to the best of my knowledge and belief.

A handwritten signature in black ink, appearing to read 'K. T. Fisher', with a stylized, sweeping flourish extending from the end.

KEVIN T. FISHER
