

ENGINEERING STATEMENT
OF
BENJAMIN L. PIDEK, P.E.
IN SUPPORT OF AN APPLICATION FOR
CONSTRUCTION PERMIT FOR AN AUXILIARY STATION
WPTV-DT
WEST PALM BEACH, FL

Background

Scripps Media, Inc. (Scripps) is the licensee of WPTV-DT which is authorized to operate its post-transition DTV facility on Channel 12 (BLCDT-20090619ACF) at West Palm Beach, FL, with an ERP of 50 kW at an HAAT of 386m. The tower is located at the following coordinates:

(NAD27)
26° 35' 20" N
80° 12' 44" W

WPTV, in the instant application, is applying for a construction permit for an Auxiliary DTV facility.

Antenna System and Tower

WPTV proposes an Auxiliary DTV facility that would use the same site and tower as its main facility but operate from a side-mounted directional Dielectric TLS-V8/VP-R S185 antenna (patterns and dBk table attached hereto) rather than the top-mounted main antenna. The

antenna will be installed on a tower (ASR#1220033) that has an overall height of 400.5m AMSL (with appurtenances). The antenna will have a center-of-radiation of 295.7m AMSL (with a calculated HAAT of 291m). No modifications to the overall structure height are necessary; however, as part of the DTV transition, Scripps replaced its old analog antenna with a new DTV antenna which made the overall structure height approximately 10.7m shorter (previous overall height of structure was 411.2m AMSL). Scripps has notified the FAA of the change (reduction) in structure height and, once the FAA has processed its notice, Scripps will modify the ASR.

The proposed WPTV auxiliary facility will incorporate both horizontal (63 kW) and vertical polarization (47.8 kW). The vertically polarized radiation component will not exceed the authorized horizontally polarized component in any azimuth.

ERP and Coverage

Scripps proposes to operate the Auxiliary DTV facility with and ERP of 63 kW; the entire principal community of West Palm Beach, FL will be well within the predicted F(50,90) 43dBu contour of this facility. Furthermore, as shown in Figure 1, attached hereto, the predicted 36 dBu F(50,90) contour does not extend beyond the 36 dBu F(50,90) contour of the licensed facility.

Environmental/RFR

This report addresses only the conditions specified in 47CFR1.1307 that deal with Radio Frequency Radiation. Any other non-RFR conditions that might require the preparation of an EA are beyond the scope of this report; since the structure is existing and registered, such conditions should not be an issue requiring further consideration.

B

The location of the proposed Auxiliary DTV facility is a multi-user site and it is assumed that the site is currently "in compliance" with FCC guidelines for human exposure to RFR (as defined in OET-65). The worst case ground level RFR contributed to the site by this proposal in public areas is calculated to be 0.001732 mW/cm^2 , which is less than 5% (and, in fact, less than 1%) of the MPE for public exposure (0.2 mW/cm^2) at Ch. 12 (204-210 MHz). The contribution to the overall RFR from the proposed facility is negligible and, therefore, the site will remain "in compliance" with FCC guidelines.

Scripps agrees to comply with the Commission's requirements regarding power adjustments or cessation of operation as may be necessary to ensure a compliant environment for worker access. Workers will be trained on RFR issues and encouraged to wear personal RFR monitors when on the structure. The tower base is enclosed by a locked security fence and appropriate signage warning of potential RFR hazards is posted.

Certification

I hereby certify that the foregoing report or statement was prepared by me but may include work performed by others under my supervision or direction. The statements of fact contained therein are believed to be true and correct based on personal knowledge, information and belief unless otherwise stated; with respect to facts not known of my own personal knowledge, I believe them to be true and correct based on their origin from sources known to me to be generally reliable and accurate. I have prepared this document with due care and in accordance with applicable standards of professional practice.
