In re: Low Power Television Application of:  
Word of God Fellowship, Inc.  
Channel 08, San Francisco, CA  
File number: BDCCDVL-20061026ABW  
Facility Id No.: 167032

Dear Applicant:

In this letter, we consider the pending application BDCCDVL-20061026ABW, San Francisco, California for a digital Low Power Television construction permit. The application is opposed by Hearst-Argyle Stations, Inc.(KSBW), the licensee of television station KSBW-TV and KSBW-DT, Salinas, CA. For reasons set forth below, we deny KSBW's petition to deny and grant the low power application.

On October 26, 2006, Word of God Fellowship, Inc. filed the above referenced application proposing a new Digital Low Power Television Companion Channel station on channel 8, at Stockton, CA.

On June 21, 2007, KSBW, through counsel, filed a petition to deny the above-referenced application stating that the digital operations proposed by KDTS-LP would cause harmful interference to KSBW-TV in violation of the Commission's rules.

On June 27, 2007, KDTS-LP amended the application, correcting the directional antenna pattern tabulations. A study of the application, as amended, by the Commission staff shows that no interference is predicted to be caused to KSBW-TV facilities.

The above facts considered, we conclude that the public interest will be served by grant of KDTS-LP's digital application.

Therefore, the petition to deny of Hearst-Argyle Stations, Inc. IS HEREBY DENIED and the above captioned application IS HEREBY GRANTED.

Sincerely

Hossein Hashemzadeh  
Associate Chief  
Video Division  
Media Bureau
