OPW Surveying Job No. 2010069  
Date: November 19, 2010

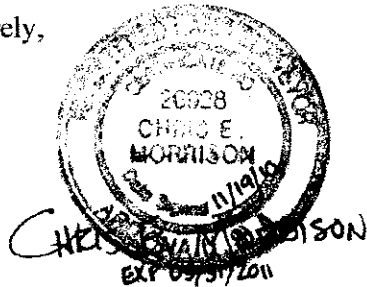

Attn: Daniel Somes, Chief Engineer

Re: Antenna Certification

Dear Daniel:

On November 18, 2010, OPW Surveying, LLC measured at distances of 500', 600' and 700' the installation of the Jampro Antenna Inc. antenna model JMPC-6 RFR 5 at 2401 W Zinnia for KGMG. While there are slight variations between the 6 antennas in the array, we confirmed it is installed with the "Boom" of element "A" oriented in the direction 75 degrees East of True North, with a margin of error of +/- 0.5 degrees.

Sincerely,

Chris E. Morrison  
Arizona Land Surveyor #26928

This is a certification that the KGMG directional antenna system authorized in the construction permit BNPFTB-20080801ANZ was installed pursuant instructions provided by the manufacturer Jampro Antenna INC,

I personally witnessed the field assembly and installation of this antenna between Oct. 29<sup>th</sup> and Nov 16<sup>th</sup>, 2010. To the best of my knowledge and belief, the antenna was in full compliance with the Jampro installation instructions of the JMPC-6 RFR.5 antenna S/N 15839. In addition the antenna installation complies with all terms of the construction permit.

The proper azimuth alignment of the tower and antenna has been checked and certified as correct by Chris E Moorison, a licensed surveyor (ALS #26928).

A handwritten signature in black ink, appearing to read 'Daniel P. Somes', with a long horizontal flourish extending to the right.
