Exhibit 12-3 - Compliance with CFR 47 §74.1233(a)(1)  
W241AO, Channel 241, 96.1 MHz, M12, Wye Mills, MD

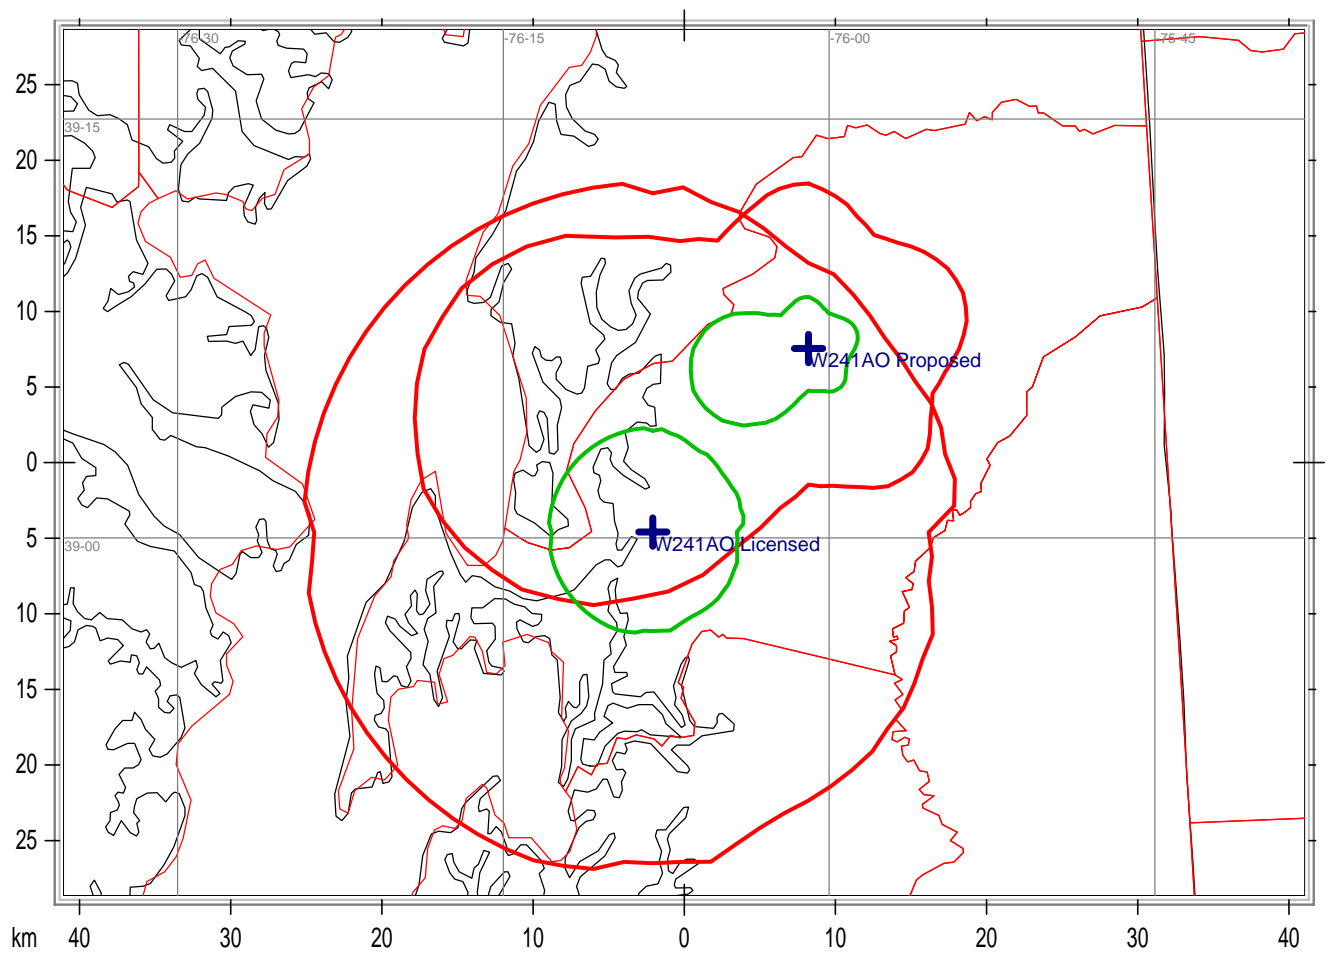

### Request for Waiver of CFR 47 §74.1233(a)(1)

This application requests a waiver to permit a one-step move to a new site to serve as a fill-in translator for WCTR-AM, Chestertown, MD (Fac ID 34030) in accordance with the waiver granted for W263AQ's move to Effingham, IL (DA-11-1495) and a subsequent grant for translator W284BI.

A waiver of Section 74.1233(a)(1) of the Commission's rules is requested to permit this single move of the W241AO translator from its current licensed transmitter site to the proposed tower inside the 2 mV contour of WCTR-AM. This waiver, when granted, will provide FM translator fill-in service on a timely and economical basis, and will accomplish a Commission objective of providing much needed assistance to small and hurting AM radio stations.

In accordance with the waiver granted for the move of W263AQ (DA-11-1495), the proposed W241AO facility is mutually exclusive with the licensed W241AO facility because the proposed 40 dBu (50,10) interfering contour overlaps the existing and licensed W241AO 60 dBu (50,50) contour (see next page).
