

EXHIBIT NO. 21

PURPOSE OF APPLICATION

Background

Station KWLN (formerly KKXA and prior to that KVYF) (FM), Wilson Creek, Washington, is licensed to operate on Channel 277C3. Pursuant to FCC Report and Order in MM Docket No. 95-163, the station was authorized to implement a frequency shift and upgrade from Channel 277C3 to Channel 278C1. To accommodate the upgrade, Station KWHT, Pendleton, Oregon, was ordered from Channel 278C1 to Channel 279C1. The FM Table of Allotments was amended accordingly.

Dismissal of Pending Upgrade Application

On February 27, 1997, KVYF submitted an application to implement the frequency shift (BPH-19970227ID). However, the current licensee of the station, Morris Communications Corporation, has determined not to go forward with the frequency shift. It therefore hereby requests dismissal of the pending upgrade application and is submitting the instant application specifying a one-step downgrade of Station KWLN. The purpose of the application is to return the FM Table of Allotments to what it was prior to the upgrade authorized in MM Docket 95-163. The location and facilities proposed herein are the station's currently licensed facilities. No construction is proposed.

Contingent Application for KWHT, Pendleton, OR

Concurrently herewith, KSRV, Inc., the licensee of Station KWHT, is submitting a mutually contingent application on FCC Form 301 specifying KWHT's currently licensed facilities on Channel 278C1. The intent of the parties is to amend the FM Table of Allotments, reverse the channel changes ordered in MM Docket 95-163 and reinstate the channels and classes reflected in the current licenses of Stations KWHT and KWLN.
