Jay White
Alpha Broadcasting
1321 North Gene Autry Trail
Palm Springs, CA 92262

Ref: KFUT and KVGH

Dear Mr. White,

We anticipate no adverse effects to the directional pattern of either KFUT or KVGH from the KKUU or KCLB antennas. The separation between antennas is in excess of the recommended 10 ft. separation.

The coaxial transmission lines which are used to feed the KKUU and KCLB antennas are mounted behind the support mast and will have no adverse effect on the pattern of the KFUT or KVGH antennas.

If you have any additional questions please don't hesitate to call.

Sincerely,

Douglas A. Ross
President
