WVOH-FM RADIO STATION
CH 228C2 - 93.5 MHZ - 50.0 KW
NICHOLLS, GEORGIA
October 2010

TECHNICAL STATEMENT

This Technical Statement and attached exhibits were prepared on behalf of Broadcast South, LLC ("BSL"), licensee of station WVOH-FM, Channel 228C3, Hazlehurst, Georgia. BSL also holds an outstanding permit for WVOH-FM to relocate, upgrade to Channel 228C2 and change city of license from Hazlehurst, Georgia to Nicholls, Georgia. BSL herein proposes to modify the WVOH-FM permit by relocating to a different site, while retaining Nicholls, Georgia as its city of license.

BSL proposes to install the WVOH-FM antenna on a new tower structure. As such, the FAA was apprised of this proposal and has issued a Determination of No Hazard. The tower was registered with the FCC and assigned Antenna Structure Registration Number 1276366.

At the site for the proposed WVOH-FM facility, Channel 228C2 does not meet §73.207 spacing requirements to one station and one vacant allotment. BSL proposes to address these shortspacing issues pursuant to §73.215 of the Commission's rules. See Exhibit A for details. All other necessary documentation used to certify the technical portion of FCC Form 301 has been forwarded to BSL and is available to the Commission upon request.¹

1) The undersigned has evaluated only the radio frequency radiation exposure portion of the environmental review. All data regarding broadcast facilities was extracted from the CDBS database on the date of the spacing study included herein. We assume no liability for errors or omissions in that database which may be adverse to the request contained herein.
