

**ASSIGNEE'S EXHIBIT 14**

There will be principal community service contour overlap between station WJNC (the subject of the present application) and two other facilities under common control. The first is WSTK (AM), (Facility ID No. 15829), Jacksonville, North Carolina, which is licensed to Eastern Broadcasting, Inc., an entity which is controlled by Conner Media Corporation. The second is the pending application of Conner Media Corporation for a new AM station on 1400 kHz at Jacksonville, North Carolina (FCC File No. BNP-20000201ACP). Although that facility is merely a pending application, for purposes of this exhibit we can assume that it is attributable. Even so, this situation will comport with the Commission's local radio ownership rule.

We respectfully note that also licensed to Jacksonville, North Carolina are the following stations:

WJCV (AM), 1290 kHz  
WKOO (FM), 98.7 mHz  
WQSL (FM), 92.3 mHz  
WQXR (FM), 105.5 mHz

Accordingly, among stations licensed to Jacksonville, the proposed assignee would have an attributable interest in only three of seven commercial facilities. None of the principal community contours of any other station in which the proposed assignee has an attributable interest would overlap the principal community contour of WJNC. Accordingly, it is clear that, as the result of the acquisition proposed herein and were BNP-20000201ACP to be granted, then the proposed assignee would have an attributable interest in less than half of the stations which would define the relevant market.
