JOB # 08-8026

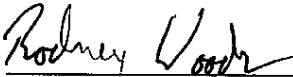

This letter is written in reference to the directional verification of the new installation of an antenna for C.S.N. International. The antenna was installed on an existing Tower, near Eureka Springs, Arkansas, owned by Jerry Clark.

The location of said Tower is, Latitude 36°21'38"N- Longitude 93°44'54"W.  
Both bays of this antenna have been verified to be directionally aimed to an azimuth of 170° +/- 30 minutes.

On May 2, 2008 a solar observation was performed to determine true North. Using a Nikon NPL-352 and a TDS Recon data collector control points were established for later use.

On May 9, 2008 the antenna aiming verification was completed using a Nikon NPL-352 and a TDS Recon data collector.

Field work was processed using Auto Desk Land Desktop 2006.
