

Clear Channel Broadcasting Licenses, Inc., Assignee  
FCC Form 314  
Response to Section III, Item 6

**EXHIBIT 14**

**MULTIPLE OWNERSHIP STUDY**

TECHNICAL STATEMENT  
 RADIO MULTIPLE OWNERSHIP ANALYSIS  
 CLEAR CHANNEL BROADCASTING LICENSES, INC.

This statement and the attached figures were prepared on behalf of Clear Channel Broadcasting Licenses, Inc., a licensee subsidiary of Clear Channel Communications, Inc. (“CCC”). CCC proposes the acquisition of WWBX(FM) and WABI(AM). A multiple ownership analysis was prepared considering the following radio stations under present or proposed common ownership or time brokerage:

<b>Call Sign</b>	<b>City of License</b>	<b>Facilities</b>
WABI(AM)	Bangor, ME	910 kHz, 5 kW, U, DAN
WSKW(AM)	Skowhegan, ME	1160 kHz, 10 kW, U, ND1
WCTB(FM)	Fairfield, ME	Channel 228C3, 10.5 kW, 152 m
WWBX(FM)	Bangor, ME	Channel 246B, 5 kW, 375 m
WKSQ(FM)	Ellsworth, ME	Channel 233B, 11.5 kW, 313 m
WBFB(FM)	Belfast, ME	Channel 284B, 10 kW, 335 m
WFZX(FM) <sup>1</sup>	Searsport, ME	Channel 269A, 1.4 kW, 213 m
WGUY(FM)	Dexter, ME	Channel 271C2, 26.5 kW, 205 m
WVOM(FM)	Howland, ME	Channel 280C, 54 kW, 460 m

Since certain of these stations have overlapping principal community contours (5 mV/m for AM stations, 3.16 mV/m for FM stations), an ownership study has been prepared in accordance with the Federal Communications Commission multiple ownership rules.<sup>2</sup>

CCC does not have or propose to have an attributable interest in any other station with a principal community coverage contour that overlaps or intersects the station proposed to be owned.

Radio Markets

The “radio market” applicable to common ownership of the subject stations is defined as the area encompassed by the mutually overlapping principal community contours of the commonly owned stations. The predicted principal contours of WABI(AM), WSKW(AM), WCTB(FM), WWBX(FM), WKSQ(FM), WBFB(FM), WFZX(FM), WGUY(FM) and WVOM(FM) are shown in Figure 1 herein. There are four “radio markets” for analysis under the Commission’s Rules.

Market 1 is defined by the principal community contours of WSKW(AM), WCTB(FM) and WWBX(FM).

Market 2 is defined by the principal community contours of WCTB(FM), WWBX(FM) and WGUY(FM).

<sup>1</sup> There is a granted construction permit (BMPH991019AK) for WBYA(FM) to modify its facilities.

<sup>2</sup> See Section 73.3555 of the FCC Rules.

Market 3 is defined by the principal community contours of WABI(AM), WWBX(FM), WBFB(FM), WGUY(FM) and WVOM(FM).

Market 4 is defined by the principal community contours of WABI(AM), WWBX(FM), WKSQ(FM), WBFB(FM) and WFZX(FM)(LIC) or WFZX(FM)(CP).

#### Count of Stations in Defined Markets

The number of radio stations in each "radio market" is determined by counting the operating, commercial stations having principal community contours which overlap or intersect the principal community contours which define the radio market, plus the subject co-owned stations.

In Market 1, there are 28 radio stations (4 AM and 24 FM), including the subject co-owned stations, that intersect or overlap the "radio market."

In Market 2, there are 34 radio stations (4 AM and 30 FM), including the subject co-owned stations, that intersect or overlap the "radio market."

In Market 3, there are 28 radio stations (5 AM and 23 FM), including the subject co-owned stations, that intersect or overlap the "radio market."

In Market 4, there are 27 radio stations (5 AM and 22 FM), including the subject co-owned stations, that intersect or overlap the "radio market."

Figure 2 is the tabulation of the other radio stations identified in each of the defined radio market. Only known licensed, operation commercial stations were employed for the study. Distances to contours for AM stations were predicted using the antenna patterns as identified in the Commission's AM database and the appropriate Ground Wave Field Strength versus Distance Graph of 47 CFR 73.184. Ground conductivities were obtained from FCC Figure M3. Distances to the FM contours were determined based on the method of 47 CFR 73.313. Terrain data was derived from the N.G.D.C. 30-second computer database for each of the FM stations using radials spaced ever 10 degrees of azimuth.

Based on the above, it is concluded that the proposed modifications comply with Section 73.3555(a) of the FCC Rules.
