Re: Arso Radio Corp.
WPRM-FM, San Juan, Puerto Rico
Facility Identification Number: 2875
Special Temporary Authority

Dear Counsel:

This is in reference to the request filed November 2, 2011, on behalf of Arso Radio Corp. ("ARC"). ARC requests modification and further extension of the special temporary authority ("STA") granted on November 17, 2008, to operate Station WPRM-FM with emergency antenna facilities pursuant to Section 73.1680.¹ In support of the request, ARC states that its tower, which was destroyed by a hurricane, has been partially reconstructed; however, a portion of its replacement tower was received in a damaged condition, was reordered and has not yet been delivered. ARC states that it has installed an antenna on the partially-reconstructed tower, and requests modification of STA to reflect operation at the licensed site.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee has been prevented from restoring licensed operation due to causes beyond its control and has taken all possible steps to expeditiously resolve the problem.

¹ WPRM-FM is licensed for operation on Channel 253B (98.5 MHz) with effective radiated power of 25 kilowatts (H&V) and antenna height above average terrain of 581 meters.

Thus, extension of STA is warranted.

Accordingly, the request for modification and extension of STA IS HEREBY GRANTED.
Station WPRM-FM may continue to operate with the following facilities:

Geographic coordinates:	18° 06' 47" N, 66° 03' 06" W (NAD 1927)
Channel	253 (98.5 MHz)
Effective radiated power:	25 kilowatts (H&V)
Antenna height:	
above ground:	34 meters
above mean sea level:	914 meters
Above average terrain:	557 meters

ARC must notify the Commission when licensed operation is restored. ARC must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. See 47 CFR § 1.1310.

This authority expires on **May 18, 2012**.

Sincerely,

Charles N. Miller, Engineer
