"*"Affixed to 'IN' or 'Out' values = site inside protected contour.
 ERP and HAAT are on direct line to and from reference station.
 "<" = Station meets FCC minimum distance spacing for its class.

Exhibit 12 (Compliance with CFR 74.1204)

The proposed FM Translator is located within the protected 60 dBu contour of second adjacent channel station WENS, channel 246B, Shelbyville, IN. The predicted F(50-50) field strength of WENS at the proposed translator site is 78.7 dBu, see Exhibit 12a. Therefore, the respective predicted interfering contour generated by the proposed FM Translator is greater than 118.7 dBu. This interfering contour extends less than 51 meters from the proposed transmit antenna, and the area of overlap does not reach the ground.

Therefore, EMF respectfully requests a waiver of C.F.R. 74.1204 based on no population within the area of predicted interference.
