

Compliance with Special Operating Conditions

The underlying construction permit is solely for the purpose of increasing the ERP of the facility. No physical changes were made to the directional antenna system; therefore the original documentation is still accurate. Exhibits 9A, 9B, and 9C use the original documentation to demonstrate compliance.

The WHVK Construction Permit (file number BMPED-20160908AAP) contains several Special Operating Conditions, summarized as follows:

1. The permittee must provide the results of a complete proof-of-performance to establish the horizontal plane radiation patterns for both the horizontally and vertically polarized radiation components.
2. The permittee must provide an affidavit from a licensed surveyor to establish that the directional antenna has been oriented at the proper azimuth.
3. The permittee must submit an affidavit that a qualified engineer oversaw the installation of the directional antenna system.
4. The relative field strength of neither the measured horizontally nor vertically polarized radiation component exceeds, at any azimuth, the value indicated on the composite radiation pattern authorized by the construction permit.
5. Before Program Tests are authorized, the permittee must submit an exhibit demonstrating that the measured directional antenna pattern complies with the appropriate community coverage provisions of Sections 73.315 or 73.515.
6. This is a Section 73.215 contour protection grant as requested by the applicant.
7. Waiver of 47 C.F.R. Section 73.1125 was previously granted to allow operation of the facility authorized by this construction permit as a satellite operation of station KLVR(FM), Middletown, CA (FIN 18801).
8. The permittee/licensee, in coordination with other users of the site, must reduce power or cease operation as necessary to protect persons having access to the site, tower, or antenna from radiofrequency electromagnetic fields in excess of FCC guidelines.

Educational Media Foundation ("EMF"), complies with, or agrees to, these conditions, as follows:

1. See Exhibit 9A
2. See Exhibit 9B
3. See Exhibit 9C
4. See Exhibit 9A
5. See Exhibit 9D
6. EMF confirms that this is a Section 73.215 contour protection grant.
7. EMF reiterates the commitments outlined in its request for waiver of section 73.1125. See also Exhibit 6.

8. EMF agrees to reduce power or cease operation as necessary to protect persons having access to the site, tower, or antenna from radiofrequency electromagnetic fields in excess of FCC guidelines.

Therefore, all Special Operating Conditions of the WHVK Construction Permit (FCC File Number BMPED-20160908AAP) have been met.
