Re: CBS Radio East Inc.
WINS (AM), New York, New York
Facility Identification Number: 25451
Special Temporary Authority

Dear Mr. Benedict:

This is in reference to the request filed July 12, 2010, on behalf of CBS Radio East Inc. ("CBS"). CBS requests extension of the special temporary authority ("STA") granted on January 22, 2010, and modified on April 22, 2010, to operate Station WINS with parameters at variance and/or reduced power while maintaining monitor points within licensed limits, and with its substantially adjusted daytime and nighttime directional patterns.¹ In support of the request, CBS states that it has completed work on the WINS towers and that its application for license is pending.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee has made substantial progress toward restoring licensed operation. Thus, extension of STA is warranted. In light of the information provided, nondirectional operation is no longer necessary; the STA is modified accordingly.

¹ WINS is licensed for operation on 1010 kHz with 50 kilowatts daytime and 50 kilowatts nighttime, employing different directional antenna patterns daytime and nighttime (DA-2-U).

Accordingly, the request for extension of STA IS HEREBY GRANTED, with modification as discussed above. Station WINS may continue to operate with its substantially adjusted daytime and nighttime directional antenna systems; operating parameters shall be maintained as specified in the original request.² It will be necessary to further reduce power or cease operation if complaints of interference are received. CBS must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. See 47 CFR § 1.1310.

This authority expires on **February 11, 2011**.

Sincerely,

Charles N. Miller, Engineer
Audio Division
Media Bureau

cc: CBS Radio East Inc.

² Operating parameters shall be maintained within $\pm 5\%$ current ratios and $\pm 3^\circ$ phase of the MOM-derived parameters, which shall be posted with the station license along with a copy of this letter.
