

Exhibit 17 - OET-65 Compliance

The OET-65 uncontrolled area, determined by formula $RAD = (33.4 * KWERP) / (DIST^2)$, is located within a 6.5 meter radius of the 9 meter AGL transmit antenna radiation center (RC). The controlled area is within a 2.9 meter radius of RC.

The closest structures are ranch-style single-story residences built on non-elevated concrete slabs, depicted in **Figure 1**. The area of concern is above all public locations.

Licensee shall ensure that radiation warning signs are properly displayed and shall cooperate with others by reducing power or terminating broadcasts during time when they are within the area of concern.
