

EXHIBIT 6 (Revised)
FCC Form 315
Section II, Paragraph 4

Changes In Interests

As described more fully below, by this Form 315 application and 13 companion Form 315 applications, Transferor Katonah Pittman Ventures LLC (“KPV”), which holds a majority voting interest in Transferee Pilot Group GP LLC (“Pilot GP”), the controlling entity of Barrington Broadcasting Group, including the 16 full-power television stations subject to these applications and listed in Exhibit 8 (the “Barrington Stations”), seeks consent to the relinquishment of its majority voting rights in Pilot GP with respect to the Barrington Stations.¹ Following the proposed change, none of the remaining attributable owners of Pilot GP (each a long-time co-investor in the company) would hold a majority voting interest in Pilot GP with respect to the Barrington Stations (*see* Ex. 16). The relinquishment of control would be accomplished without transferring LLC membership units of Pilot GP. The change would occur as a result of the proposed readjustment of the voting rights (but not equity interests) among the existing members of Pilot GP.²

Transferor KPV, a Delaware limited liability company controlled and principally owned by Robert W. Pittman, holds the right to vote a 58.7% LLC membership interest in Pilot

¹ Exhibit 8 also lists two television stations controlled by Pilot GP which are not included in the Barrington Stations and are not subject to these applications: WEYI-TV, Saginaw, Michigan, which is licensed to Barrington Flint License LLC, and WBSF(TV), Bay City, Michigan, which is licensed to Barrington Bay City License LLC. KPV would continue to hold its existing majority voting rights with respect to those two stations and, accordingly, the proposed change would not effect a transfer of control with respect to the two stations.

² Pilot GP also controls, through intervening companies, five companies that, taken together, are the licensees of 32 radio stations in various markets (“Pilot Radio Stations”). Separate companion Form 315 applications are pending for each of those five radio station licensee subsidiaries.

GP.³ Pilot GP is the sole general partner of Pilot Group LP, which in turn is the sole member of Barrington Broadcasting LLC. Barrington Broadcasting LLC is the sole member of Barrington Broadcasting Group LLC which owns and operates, through indirect subsidiaries, the full-power television stations (including two satellites) listed in Exhibit 8.

KPV proposes (subject to prior FCC consent) to relinquish its voting rights in Pilot GP – the controlling general partner – with respect to the Barrington Stations by adopting nonvoting status pursuant to an amendment to the Pilot GP LLC Operating Agreement.⁴ As a result, the voting rights of the attributable members of Pilot GP with respect to the Barrington Stations would increase but with no member holding a majority of the voting rights (*see* Ex. 16). (The proposed relinquishment of control with respect to the Barrington Stations does not involve

³ Pursuant to the Pilot GP LLC Operating Agreement, KPV's designee currently has the right to vote the LLC membership interests of one of the other LLC members. Thus, KPV, together with its direct LLC membership interest, currently has the right to vote an approximate 78% interest in Pilot GP. KPV's designee currently is Mr. Pittman.

⁴ Pursuant to the amended LLC Operating Agreement (*see* Ex. 7), KPV would no longer have the right to vote its 58.7% equity interest in any matters relating to the Barrington Stations or the Pilot Radio Stations, except in the sole case of a transaction involving a sale or other disposition of all or substantially all of the Barrington Stations or the Pilot Radio Stations. (KPV also would retain a right to vote in circumstances relating solely to investments or activities unrelated to any FCC license entity). In addition, under the amendment KPV would no longer have the right to exercise the voting rights of another member of Pilot GP. Last, KPV would opt to become (i) an insulated member of Pilot GP under the terms of the Pilot GP LLC Operating Agreement with respect to the Barrington Stations and the Pilot Radio Stations and (ii) an insulated limited partner of Pilot Group LP under the terms of the limited partnership agreement with respect to the Barrington Stations and the Pilot Radio Stations. The amended LLC Operating Agreement further provides that communications with KPV regarding the Barrington Stations and Pilot Radio Station will be restricted in a manner consistent with the insulation provisions and that Pilot GP will maintain information barriers (including among Pilot Group LP and its members and subsidiaries) to insure compliance with such restrictions on communications. Accordingly, following the proposed change, KPV (including its owners) would be subject to the standard FCC insulation criteria with respect to, and would no longer hold an attributable interest in, the Barrington Stations or the Pilot Radio Stations.

transferring equity units of Pilot GP; nor does it involve any exchange of monetary consideration.) Thus, by this application and companion applications,⁵ the parties seek FCC consent to the relinquishment of control of Pilot GP (and, through its direct and indirect subsidiaries, the Barrington Stations) from KPV to Pilot GP, with none of the attributable members of Pilot GP holding a majority voting interest.

⁵ Annex A hereto provides a list of the 14 Form 315 applications for the Barrington Stations with a notation (where applicable) of any multiple ownership compliance showing.
