

**June 2012
KWLZ-FM Channel 242C3
West Linn, Oregon
Allocation Study**

Contingent Application Group

The instant application is being filed as an amendment to an application which is part of a contingent application group comprised of the following two applications:

- a) BPH-20110823ABX, in which Horizon Broadcasting Group, LLC (“Horizon”) requests a construction permit to operate KWLZ-FM on Channel 242C3 at West Linn, Oregon, from a tower with FCC Antenna Structure Registration No. 1033770.
- b) BPH-20110823ACB, in which 3 Cities, Inc. (“3 Cities”) requests a construction permit to operate KXXO on Channel 241C at Olympia, Washington, from a tower to be constructed on Capitol Peak, in order to accommodate the proposed KWLZ-FM operation.

Both applications are requesting processing pursuant to §73.215 of the Commission’s Rules.

This amendment makes a change in the proposed KWLZ-FM transmitter site coordinates, height, and ERP, and eliminates the directional antenna.

It should be noted that while KWLZ-FM currently operates on Channel 243C at Warm Springs, Oregon, the station’s license was modified to specify Channel 242C3 at West Linn by the grant of BPH-20070119AAT. Since the change in community of license to West Linn is a final action, no further Section 307(b) analysis is required in this application.

Spacing Study

The attached spacing study shows that the proposed KWLZ-FM operation meets the co-channel and adjacent channel spacing requirements for Class C3 stations as prescribed in §73.207 of the Commission's Rules, with the following exceptions:

KZEL-FM License & CP: The proposed operation is short-spaced to the licensed operation and the construction permit of KZEL-FM on Channel 241C at Eugene. The KZEL-FM construction permit BPH-20090204AAO, however, was requested by that station’s licensee in

response to an application filed by KWLZ-FM (see BMPH-20080828ABE) which triggered a Class C0 reclassification process on KZEL-FM. The KZEL-FM licensee subsequently secured a construction permit for KZEL-FM which achieved at least 451 meters HAAT, allowing KZEL-FM to retain Class C status and resulting in the dismissal of the KWLZ-FM application BMPH-20080828ABE.

The KZEL-FM construction permit expired unbuilt on June 12, 2012. Since that construction permit was granted in response to a “triggering” application, the KZEL-FM license is automatically reclassified as a Class C0 facility:

The current three-year construction period will be applicable to Class C stations that obtain permits under this procedure. Upon grant of such a construction permit application, the triggering application will be dismissed. If the construction is not completed as authorized, the subject Class C station will be reclassified automatically as a Class C0 station, and the triggering applicant will be free to refile.¹

The proposed KWLZ-FM facility is located 169 kilometers from the licensed KZEL-FM facility, fully satisfying the first-adjacent-channel Class C3-to-C0 spacing requirement of 152 kilometers.

KXXO License: The proposed operation is short-spaced to the licensed operation of KXXO on Channel 241C at Olympia. This short-spacing is not relevant to this application, owing to the fact that KXXO is simultaneously filing a site change application.

KXXO Application: The proposed operation is short-spaced to the simultaneously-filed application for modification of KXXO, which itself requests §73.215 processing. Processing pursuant to §73.215 of the Commission’s Rules is requested with respect to the KXXO application facility, and the attached allocation study map is included to demonstrate the lack of prohibited contour overlap with that facility, assuming operation of KXXO with its proposed facilities.

¹ Second Report and Order in MM Docket No. 98-93, *1998 Biennial Regulatory Review – Streamlining of Radio Technical Rules in Parts 73 and 74 of the Commission’s Rules*, FCC 00-368, Released November 1, 2000, at paragraph 26.

LPFM Stations

The grant of BPH-20070119AAT impacted several cochannel LPFM stations in the vicinity of West Linn. Each of these LPFM stations has pursued modification to a new channel, and holds an STA for such operation. Final resolution of the Form 318 applications is on hold pending final resolution of the second-adjacent channel waiver standard proposed in MM Docket No. 99-25.²

KPVN-LP 242L1 Woodburn (time share with KPCN-LP) holds an STA for operation on Channel 240L1, with a pending application for permanent modification to that channel.

KPCN-LP 242L1 Woodburn (time share with KPVN-LP) holds an STA for operation on Channel 240L1, with a pending application for permanent modification to that channel.

KQRZ-LP 242L1 Hillsboro holds an STA for operation on Channel 268L1, with a pending application for permanent modification to that channel.

KKJC-LP 242L1 McMinnville holds an STA for operation on Channel 228L1, with a pending application for permanent modification to that channel.

KQSO-LP 242L1 Newberg holds an STA for operation on Channel 275L1, with a pending application for permanent modification to that channel.

Therefore, the existing LPFM authorizations on Channel 242L1 are no impediment to grant of the instant application.

² See *In the Matter of Creation of A Low Power Radio Service*, Third Report and Order and Second Further Notice of Proposed Rulemaking, MM Docket No. 99-25, released December 11, 2007.
