

Station KTBY-DT * DTV Channel 20 * Anchorage, Alaska
Environmental Assessment Statement
Exhibit 44

As per OET Bulletin 65 (Evaluating Compliance with FCC Guidelines For Human Exposure to Radio Frequency Electromagnetic Fields) Edition 97-01, Appendix B (Summary of 1986 Mass Media Bureau Public Notice on RF Compliance), KTBY-DT is not required to file an Environmental Assessment.

KTBY-DT will place appropriate warning signs to warn the general public of the possible RF radiation exposure.

If work is to be performed on the tower in an area where overexposure could occur, KTBY-DT will take the necessary action to prevent overexposure of workers on the tower, including reducing the KTBY-DT transmitter power or ceasing KTBY-DT operation completely. Additionally, KTBY-DT will cooperate with other site users to assure that work is performed at the site without exceeding the FCC maximum permissible exposure limit (MPE) for occupational/controlled exposure.
