

**Class A TV Station WWDT-CA • Channel 43 • Naples, Florida**

**Waiver Request – Section 73.6011**

The proposed operation of Class A TV Station WWDT-CA, Channel 43, Naples, Florida, complies with all spacing and contour protection requirements in the Rules except for one. There is overlap between the protected 64 dBu F(50,50) coverage contour of TV Station WOTF, Channel 43, Melbourne, Florida, and the 29 dBu F(50,10) interference contour of the proposed operation. Pursuant to Section 74.705(e), waiver of Section 73.6011 is respectfully requested since terrain dependent (OET-69) propagation calculations demonstrate that the proposed facility would not be likely to cause interference to WOTF.

The relevant results of the OET-69 interference analysis are shown below.

tvixstudy 2.3.16
