**Subject:** FW: Canadian Response to USCL-3121

Son:

This is in reference to the 1550 kHz, KRPI, Ferndale, WA CL-3121 notification referenced below in my June 29, 2011 email. Today I received word from Canada that they are withdrawing their objection to the KRPI daytime parameters in CL-3121 contained in the attached email & now accept the CL-3121 day portion of KRPI. There were no changes to any of the other items contained in CL-3121.

Thanks,  
George

**Subject:** Canadian Response to USCL-3121

Son:

In a letter dated May 17, 2011, Canada responded to USCL-3121.

Concerning the notification for 1550 kHz, KRPI, Ferndale, WA, Canada maintains its objection to the day parameters from their response to USCL-3100 dated July 15, 2010. Canada has noted that the night operation of KRPI offers no cause for objection.

There were no Canadian objections to any of the other items contained in USCL-3121.

Thanks,  
George
