In re: Capstar TX, LLC  
WEND(FM), Salisbury, NC  
Facility I.D. No.: 74074  
Request for confirmation of compliance with  
47 C.F.R. § 73.1125

Dear Licensee:

This refers to your attorney's letter requesting confirmation that the main studio location of WEND, Salisbury, NC, complies with 47 C.F.R. § 73.1125. The letter included a supplemental showing of technical statements and studies which use an alternate propagation methodology to demonstrate that the main studio location is within the 70 dBu field strength contour for the facilities specified by WEND's license BLH-19990302KD as required by 47 C.F.R. § 73.1125. The main studio is located at 801 Woodridge Center Drive, Charlotte, NC (35° 11' 04" N.L., 80° 53' 42" W.L.).

The engineering study which WEND submitted calculated the desired field strength contours using the Institute of Telecommunication Sciences Irregular Terrain Model, also known as the "Longley-Rice" model permitted by 47 C.F.R. § 73.313(e) and (f). Your study indicates that the 801 Woodridge Center Drive location lies within the 70 dBu contour as defined using the Longley-Rice prediction methodology. Furthermore, the exhibit demonstrates that the distance to WEND's authorized 70 dBu field strength contour exceeds the distance to the 70 dBu field strength contour as calculated using the F(50,50) propagation curves by approximately 16% along the azimuth from WEND's transmitter location in the direction of the proposed main studio.<sup>1</sup> Therefore, your engineering showing was referred to the Commission's Office of Engineering and Technology (OET) for a detailed propagation analysis.

By way of a Memorandum dated June 20, 2012, the OET confirmed that the main studio location is encompassed by the 70 dBu field strength contour of the facilities specified in WEND's license. Accordingly, we find that WEND's main studio location would be in compliance with 47 C.F.R. § 73.1125.

Sincerely,

Rodolfo F. Bonacci  
Assistant Chief  
Audio Division  
Media Bureau

cc: Marissa Repp, Esq.
