On October 28, 2005, EMC Engineering Services, Inc. observed the positioning of WLXP, Savannah, Georgia, Electronic Research, Inc. Model LP-4E-HW-DA antenna installation. As Prescribed in the installation directions of the antenna manufacturer, the boom azimuth of the antenna was calculated and verified. As of the date of the fieldwork, the azimuth-orientation of the antenna boom was 63 degrees with respect to True North. The accuracy of this study is better than ± 0.49 degrees.
