Federal Communications Commission

RE: Installation of WZCO, Chadbourn FM Directional Antenna

To Whom It May Concern:

I, Alan D. Kirschner, am a qualified broadcast engineer known to the Federal Communications Commission for over 40 years having obtained a First Class Radiotelephone Operator License with Ship Radar Endorsement in 1971 (now General Class Radiotelephone Operator License with Ship Radar Endorsement, License number PG-2-11836). Since that time I have been involved in engineering numerous FM radio stations.

On March 21 & 22, 2012 I personally observed the assembly and installation of the Jampro JFVX 3/2/3(8)R DA FM antenna for WZCO, Chadbourn, NC. Then on August 12 & 13, 2013 I personally observed the assembly and installation of the additional Jampro JFHD-1/1 (1)-R horizontal bay. I certify that the assembly and installation were done according to manufacturer's instructions and performance should be as documented.

Sincerely,

A handwritten signature in black ink, appearing to read "Alan D. Kirschner", written in a cursive style.

Alan D. Kirschner  
President  
Kirschner Broadcast Services, L.L.C.
