July 21, 2009

In evaluating the proposed conversion to digital for K24GS (K25FT) FID 14303, Channel 24 was found to cause lethal levels of interference to KGET-DT, FID 34459. A search was made and channel 17 (T) was identified as a displacement channel with acceptable coverage. After thorough searching, channel 17 was found to cause no lethal levels of interference to other stations. Thus, Three Angels Broadcasting Network respectfully requests that the Commission look favorably on this application.
