**Second-Adjacent Waiver Request**  
**Savannah, GA**

The proposed LPFM station will broadcast on channel 241, which is within the 93 kilometers second-adjacent minimum distance separation of station WJCL-FM on channel 243. The WJCL-FM interfering contour at the LPFM tower site is 95.8 dB $\mu$  F(50,50). Using the ratio of 100:1 (LPFM to WJCL-FM) on the second-adjacent channel, the population within the proposed LPFM 135.8 dB $\mu$  contour is zero. Using the free space equation, the predicted interference area is expected to extend 11 meters from the antenna. We have proposed the antenna will be 28 meters above ground level, thus the interference area will never reach the ground. There are no occupied structures or elevated roadways within the interference within the interference area of the LPFM. Therefore, the application is in compliance with §73.807(e)(1) *Waiver of the second-adjacent channel separations.*
