Re: Survey Services

Dear Mr. Robert Branch:

03 Dec 2010

On 03 December, 2010, I *Peter A. Groben*, president of **G&A Land Surveying Inc.** observed the positioning of the **KSDW** Mount Palomar California **ERI Model LP-2E-DA** configuration Antenna installation.

As of the date of the field work I observed the Azimuth of the Direction of the Antenna boom to be 146 Degrees with respect to True North.

The Basis of Bearings for determining the Azimuth for this study was based upon GPS observations made at the site 19 Jan 09. Data was processed by the National Geodetic Survey "**OPUS**" web-site. The precision of accuracy for this reading is better than +/- 0.49 degrees.

Respectfully,

Peter A. Groben
L.S. 7591 Ex. 31 Mar 2012
President **G&A**
