Re: Cumulus Licensing LLC (Cumulus)  
KUGN(AM), Eugene, OR  
Facility Identification Number: 12506  
Special Temporary Authority (STA)  
BESTA-20190619AAX

Dear Mr. Denning:

This is in reference to the request filed on June 19, 2019. Cumulus requests an extension of the STA granted on June 6, 2018, to continue operating daytime (using nighttime pattern at reduced power) to allow time to complete all required repairs.<sup>1</sup> In support of its request Cumulus states that additional time is needed to complete repairs and resume licensed operations.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Accordingly, the request for extension of the STA IS HEREBY GRANTED, and Cumulus may continue to operate daytime using its nighttime DA pattern with a maximum power of 1.4 kW (with no change to the licensed 5 kW nighttime operation). Cumulus must follow the procedures outlined in Section 73.69(d) of the Commission's rules if the antenna monitor must be replaced, reduce power or cease operations if complaints of interference are received, and use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in

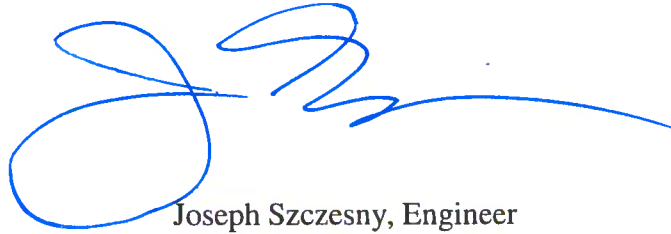

---

<sup>1</sup> KUGN(AM) is licensed for operation on 590 kHz with 5 kW day (ND), and 5 kW night (DA).

excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310. Cumulus must submit an e-mail to my attention to certify the date the station resumed licensed operations per BL-19980722AA with negligible changes to verify that an FCC Form 302 application is not needed.

This authority expires on **January 15, 2020**.

Sincerely,

A handwritten signature in blue ink, consisting of a large loop followed by a series of smaller, connected loops and a long horizontal stroke extending to the right.

Joseph Szczesny, Engineer
