

**Engineering Statement in Support of  
Change to the Community of License****Introduction**

This statement is included to show that the proposed move to the station KKLTV will comply with the 307(b) fair distribution guidelines.

**Discussion**

In the instructions for the new Form 301, the FCC describes several points that are suggested for a showing that the proposed community of license change would result in a preferential arrangement of allotments under section 307(b).

**1. Minimum Requirements**

The commission has requested that any 307(b) showing contain the following minimum information:

- Since new technical facilities are proposed, the population and area for the new facility are as follows: the 70 dBu contour will contain 1,904 persons and 607.08 sq. km. and the 60 dBu contour will contain 20,452 persons and 1,939.08 sq. km. area.
- The number of stations licensed to the current community of license is 2. The number of stations licensed to the proposed community of Weiner is 0.
- The number of stations providing service to the current community of license is approximately 14. The number of stations that provide protected service to the proposed community is approximately 31.
- The population of the proposed community is 760, according to the 2000 U.S. Census data.
- The proposed city is an established, and licensable community with the social, economic, and cultural characteristics of a community that is deserving of a first local aural service. As detailed in Exhibit 32-E, Weiner is home to numerous businesses and services with its own Chamber of Commerce. There are various civic organizations as well as many churches providing services within the community. Weiner has its own school district, fire department, police department, post office, and its own city government (See Exhibit 32-E). Thus, the addition of KKLTV(FM) to this growing community is consistent with the Commission's Rules and would serve the public interest.

**2. Other Relevant Information****A. Service Area**

In order to show that the entire area that is currently served by the licensed facility of KKLTV continues to be served when the proposed move is granted, several exhibits have been attached.

- Exhibit 32-A shows all facilities that serve any portion of the current KKLTV licensed facility's coverage area.

- Exhibit 32-B is similar to Exhibit 32-A, however in order to make abundantly clear that the area is well served, contours that combine to provide at least 5 services have been colored light green.
- Exhibit 32-C is a map with the extraneous contours removed and a color coded showing of the number of stations that provide service within the current licensed contour of KKLTV. As can be seen the entire area is served by 5 or more stations, not including KKLTV.
- Exhibit 32-D is a population report that corresponds to the map at Exhibit 32-C. This further shows that 100% of the area and population that are within the current licensed contour of KKLTV continue to be well served, should the proposed move be granted.

### **B. Number of Aural Services**

The proposed move to KKLTV will result in preferential arrangement of facilities. This facility will provide Weiner, AR with its first local aural transmission. The former community of license, Turrell, AR, continues to be served by the following facilities:

FIN	Call Sign	Channel/ Freq.	Community of License
52906	WPLX-AM	1180	Turrell, AR

### **Conclusion**

The entire area within the current licensed contour of KKLTV continues to be served should the proposed facility be granted. Further it is in the public interest to grant the proposed facility since it will result in a first service to Weiner, AR.

Respectfully submitted,

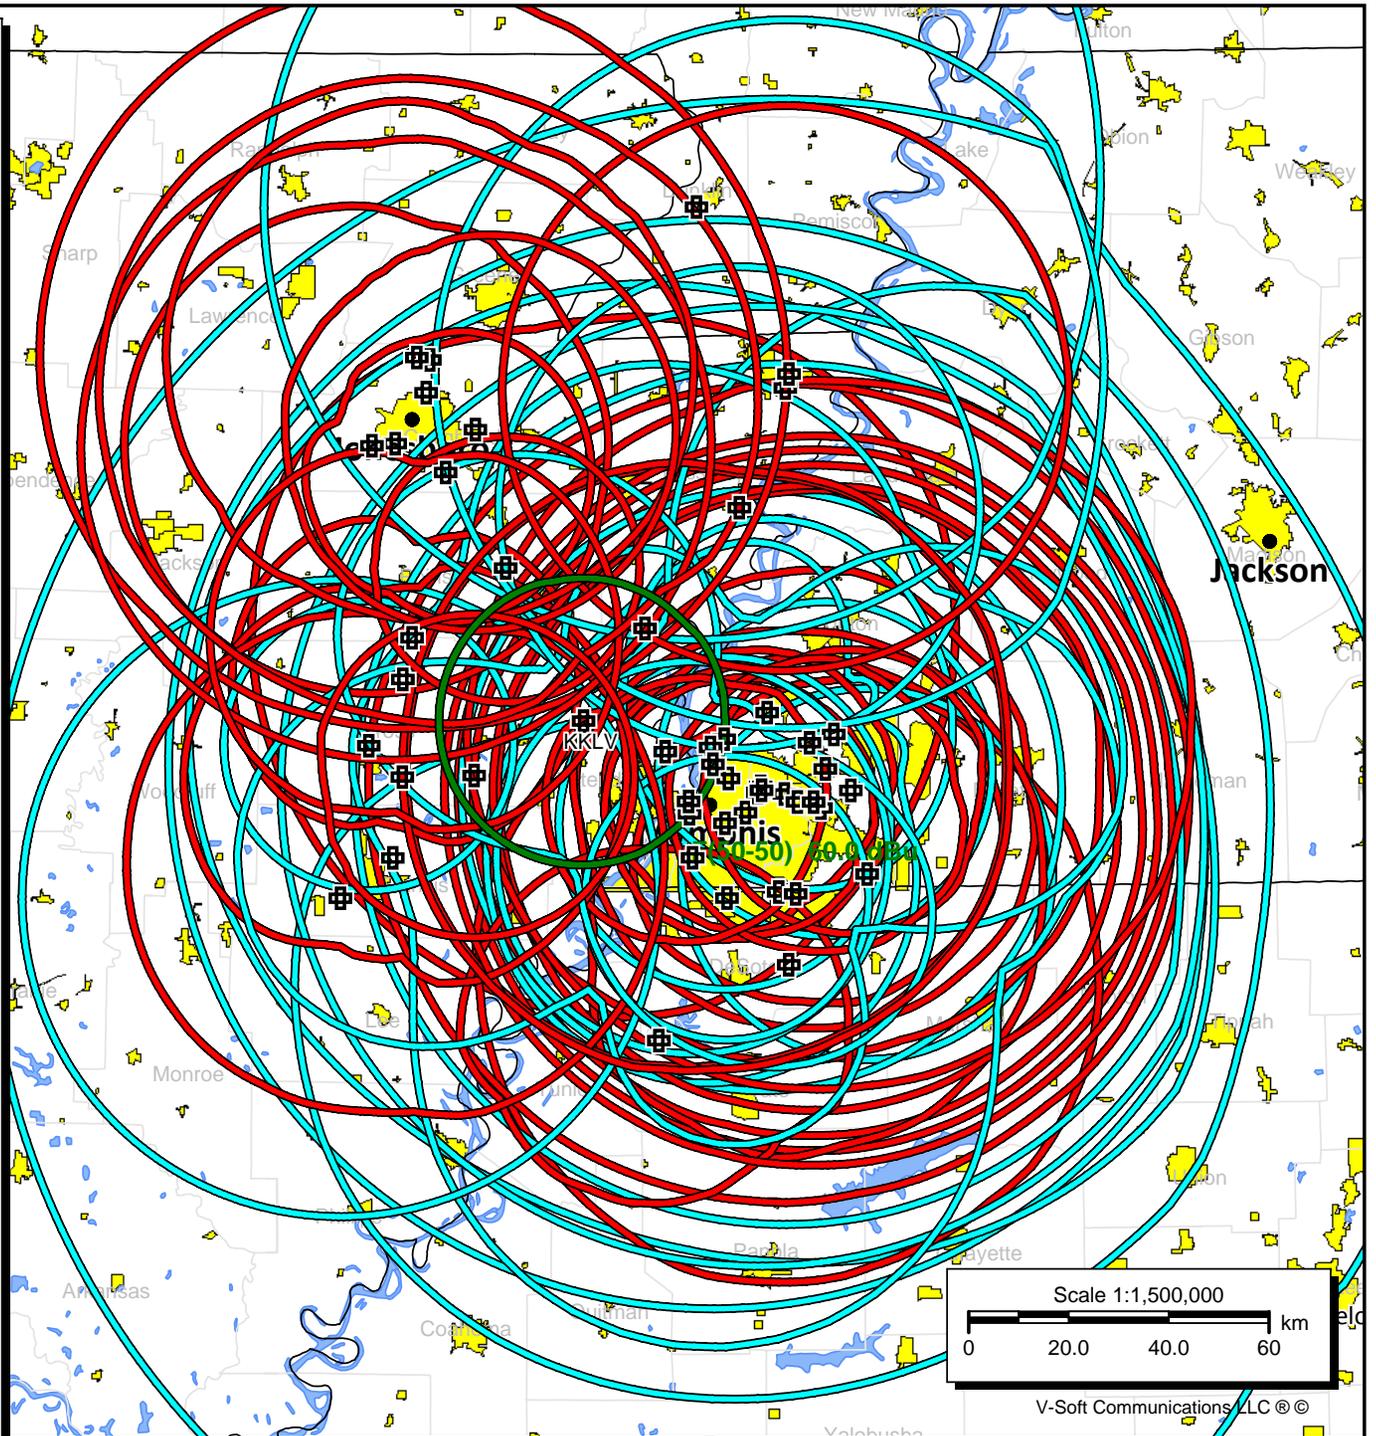

David Velasquez
