CASPTAR TX LIMITED PARTNERSHIP

WLAY-FM, FACILITY ID 19456
CLEAR CHANNEL BROADCASTING LICENSES, INC.

RADIO MULTIPLE OWNERSHIP ANALYSIS -- 03/15/2004

This statement and the attached figures were prepared on behalf of Capstar TX Limited Partnership ("Capstar") and Clear Channel Broadcasting Licenses, Inc. ("CCBL"), both licensee subsidiaries of Clear Channel Communications, Inc. Capstar and CCBL propose to modify the facilities of WXQW(FM) and WLAY-FM. A multiple ownership analysis was prepared considering the following radio stations under present or proposed common ownership or time brokerage:

Table 1: Proposed Commonly Owned or Controlled Stations Studied

Call Sign	City	State	Freq	Status
WXQW(FM)	GURLEY	AL	94.1	APP ¹
WLAY-FM	MERIDIANVILLE	AL	100.3	APP ¹
WDRM(FM)	DECATUR	AL	102.1	LIC
WTAK-FM	HARTSELLE	AL	106.1	LIC
WBHP(AM)	HUNTSVILLE	AL	1230	LIC

Since certain of these stations have overlapping principal community contours (5 mV/m for AM stations, 3.16 mV/m for FM stations), an ownership study has been prepared in accordance with the Federal Communications Commission's multiple ownership rules².

Capstar and CCBL do not have an attributable interest in any other station with a principal community contour that overlaps or intersects the proposed facility of WXQW(FM) and WLAY-FM.

Radio Markets

The "radio market" applicable to common ownership of the subject stations is defined as the area encompassed by the mutually overlapping principal community contours of the proposed commonly owned stations. These mutually overlapping contours form one "radio market", as shown in *Figure 1*, for analysis under the Commission's rules.

¹ These two applications are being filed concurrently.

² See 47 C.F.R. § 73.3555.

Radio Market "1" is defined by the mutually overlapping principal community contours of WXQW(FM) and WLAY-FM (as proposed in the accompanying Form 301 applications), WDRM(FM), WTAK-FM, and WBHP(AM). The predicted principal community contours of these stations (4 FM, 1 AM) are shown in *Figure 2*.

Count of Stations in Defined Markets

The number of radio stations in a "radio market" is determined by counting the operating, commercial stations having principal community contours that overlap or intersect the principal community contours that define the radio market, plus the subject commonly owned or controlled stations.

In Radio Market "1" studied herein, there are over 40 radio stations, including the subject co-owned stations, that overlap or intersect with the defined "radio market." *Figure 3* is the tabulation of the radio stations identified in the market.

In all figures above, stations currently owned by Clear Channel Communications, Inc. or its licensee subsidiaries are marked with an "*".

Only known licensed, operating commercial stations were included in this tabulation. Distances to contours for AM stations were predicted using the antenna patterns as identified in the Commission's AM database and the appropriate Ground Wave Field Strength versus Distance Graph of 47 C.F.R. § 73.184. Ground conductivities were obtained from FCC Figure M3. Distances to the FM contours were determined based on the method of 47 C.F.R. § 73.313. Terrain data was derived from the N.G.D.C. 30 second computer database for each of the FM stations using radials spaced every 45 degrees of azimuth.

Based on the above, it is concluded that the proposed modifications comply with § 73.3555(a) of the FCC Rules.

Sincerely,

Nestor Custodio
FCC Processing Administrator
Capstar TX Limited Partnership
Clear Channel Broadcasting Licenses, Inc.
