

EXHIBIT 4

Pursuant to Sections 73.1560(d) and 73.1635 of the Commission's rules (47 C.F.R. §§ 73.1560(d), 73.1635), New Northwest Broadcasters, LLC, licensee of radio station KQBL(FM), Billings, Montana (the "Station"), respectfully requests special temporary authority ("STA") for ninety days to continue to operate the Station at variance from its licensed parameters.

As NNB notified the Commission by letter dated February 3, 2009, the Station experienced a transmission line failure on January 24, 2009. This transmission line failure forced NNB to reduce the Station's effective radiated power to approximately twenty percent of its authorized effective radiated power of 6 kW. NNB has ordered a replacement transmission line for the Station, which it expects will be delivered within the next few weeks. Upon delivery and installation of the new transmission line, NNB anticipates that the Station will resume normal operations.

In view of the foregoing, NNB hereby respectfully requests STA to continue operations with reduced power for a period of ninety days.
