Special Temporary Authority  
BESTA-20201027AAC

Dear Mr. Menzer:

This is in reference to the request filed on October 27, 2020. YPBC requests a further extension of the STA granted on April 1, 2016, to continue operating ND at night with reduced power to allow time to file the required FCC Form 302 application after installing a new replacement tower.<sup>1</sup> In support of the request, YPBC states that it plans to file the application within the next four months to update all operating parameters, after replacing the collapsed tower #3(SW).

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Accordingly, the request for extension of the STA IS HEREBY GRANTED, and YPBC may continue to operate ND at night with a maximum of 0.25 kW, with no change to the licensed daytime 5 kW operation. YPBC must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. See

---

<sup>1</sup> WOYK(AM) is licensed for operation on 1350 kHz with 5 kW day (ND) and 1 kW night (DA).

47 CFR § 1.1310. YPBC must file a final extension request on the date shown below to operate with nighttime DA parameters at variance if the FCC Form 302 application is still pending.

This authority expires on **April 27, 2021**.

Sincerely,
