Re: Radio License Holding SRC LLC (RLH)
KTCT(AM), San Mateo, CA
Facility Identification Number: 51188
Special Temporary Authorization (STA)
BESTA-20190822AAC

Dear Mr. Denning:

This is in reference to the request filed on August 22, 2019. RLH requests a further extension of the STA granted on June 15, 1999, as modified on June 22, 2017, to operate with increased power at night using the attached specifications to overcome nighttime interference from station XED (Mexicali, BC, Mexico).¹ In support of the request, RLH states that the interference continues.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Accordingly, the extension of the STA IS HEREBY GRANTED, subject to the following condition: "Operation with the facilities specified herein is subject to modification, suspension

¹ KTCT is licensed for DA operation on 1050 kHz with 50 kW day and 10 kW night.

or termination without right to hearing, if found by the Commission to be necessary in order to conform to the provisions of the registration process of the ITU, or to bilateral or other multilateral agreements between the United States and any other country.” RLH may continue to operate at night in accordance with the attached four tower pattern, with no change to the licensed 50 kW daytime operation, as specified on the last license (BZ-20020830AFF). RLH must reduce nighttime power or cease STA operations if complaints of interference are received, and use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **March 8, 2020**.

Sincerely,
