

Three Angels Broadcasting Network
Dan Peek—Engineer
P.O. Box 220
West Frankfort, Illinois 62896

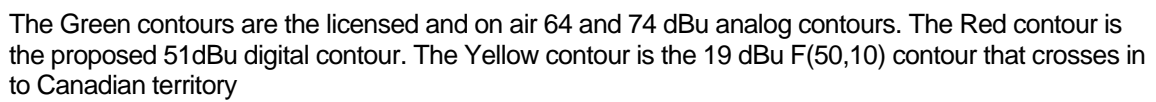

August 4, 2009

In evaluating the proposed digital flash cut for K51IN/K27HA FID 130171, an outgoing interference study was executed on the proposed design in the attached application using the OET-69 Longley Rice methodology. The stations listed in the table below showed possible interference. When these stations were evaluated for outgoing interference, there was zero percent interference present found in each case when rounded to the nearest whole percent.

Three Angels Broadcasting Network recognizes that this application will require international coordination with Canada. All the Canadian stations should have terrain shielding.
