15 North Wood Street  
Greenfield, Indiana 46140

Re: WRFM(AM), Muncie, Indiana  
Facility Identification Number: 1724  
Indiana Community Radio Corporation  
Special Temporary Authorization

Dear Ms. Cox-Hensley:

This is in reference to the request filed May 24, 2011, on behalf of Indiana Community Radio Corporation (ICRC). ICRC requests further extension of the special temporary authority (STA) originally granted to former licensee Electronic Applications Radio Service ("EARS") on September 2, 1999, and modified on September 16, 2002, to operate Station WRFM (formerly WLHN) from a site other than the licensed site, with reduced power and employing a temporary, nondirectional antenna.<sup>1</sup>

In support of the request, ICRC states that it has lost its licensed site and that no other location exists where the former array can be rebuilt. ICRC states that it has been granted status as a school corporation by the Indiana Department of Education, that it is pursuing other options to relocate the facility but that it has not found a suitable location.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

---

<sup>1</sup> WRFM is licensed for operation on 990 kHz with 0.250 kilowatt daytime and 0.001 kilowatt nighttime, employing different directional antenna patterns during daytime and nighttime hours. (DA-2-U).

Our review indicates that the licensee has been prevented from restoring licensed operation due to causes beyond its control and has taken all possible steps to expeditiously resolve the problem. Thus, extension of STA is warranted.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station WRFM may operate with the following facilities:

|                  |  |
|------------------|--|
| Transmitter site | 3908 W. 30th Street, Muncie, IN                    |
| Coordinates:     | 40° 09' 35" N, 85° 25' 55" W (NAD 1927)            |
| Frequency:       | 990 kHz  |
| Operating hours: | Unlimited  |
| Operating power: | not to exceed 62 watts daytime, one watt nighttime |
| Antenna:         | Existing tower, nondirectional (folded unipole)    |

It will be necessary to further reduce power or cease operation if complaints of interference are received. ICRC must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **November 25, 2011**.

Sincerely,

A handwritten signature in blue ink, appearing to read "Charles N. Miller", with a long horizontal flourish extending to the right.

Charles N. Miller, Engineer  
Audio Division
