

## **EXHIBIT 38**

### **K42BZ, Bozeman, Montana**

K42BZ, Bozeman, Montana (the “Station”) respectfully submits this request for Special Temporary Authority (“STA”) to operate at 30 percent of its authorized power. The Station has determined that instability in system equipment when the Station operates at full power results in undesired artifacts on the Station’s signal. Operating at reduced power provides a temporary solution to this problem.

Station engineering personnel are continuing to investigate the cause of the problem and to identify possible solutions. The winter weather at the Station’s transmitter site is hampering these efforts and the Station’s ability to return to full power. Accordingly, the Station respectfully requests STA to operate at reduced power until it can identify and implement a solution.
