

Special Operation Condition

FCC 302 application to cover CP (BXPB-20131106AGS)

WRCH(FM) fac. Id. 1910

September 18, 2015

The shared WRCH auxiliary antenna is installed on a base insulated tower. The WTIC(AM) antenna is licensed as a MOM studied array (BMML20101117BHX). The adjacent WTIC-FM tower with the auxiliary antenna was included in the modeled study which, along with field measurements, confirmed that no adverse effects to the WTIC(AM) array resulted from the antenna replacement.

WRCH will utilize the antenna, which has already been installed and licensed by other shared users, as a "one at a time" auxiliary use antenna.
