

EXHIBIT A

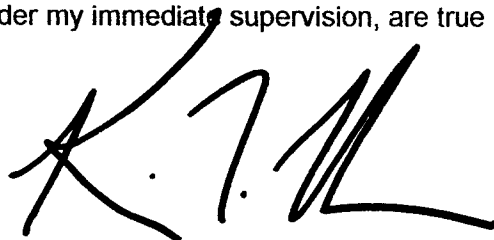

ENGINEERING STATEMENT

The engineering data contained herein have been prepared on behalf of RIVER CITY BROADCASTING, INC., permittee of KWBF-DT, Channel 43 in Little Rock, Arkansas, in support of its Application for Construction Permit to specify a change to Channel 44, based upon the FCC's Order in DA-03-86.

Exhibit B provides directional antenna pattern data, and proposed operating parameters are tabulated in Exhibit C. Exhibit D is a map upon which the predicted service contours are plotted. As shown, the city of license is completely contained within the proposed 48 dBu service contour. Since the proposed effective antenna height is greater than that specified in the Order, an interference study is included in Exhibit E. A power density calculation is provided in Exhibit F. It is not expected that the proposed facility would cause objectionable interference to any other user of the site proposed herein, but the owner of KWBF-DT recognizes its obligation to correct any such interference that may occur.

Since no change in the overall height or location of the existing tower is proposed herein, the FAA has not been notified of this application. In addition, the FCC issued Antenna Structure Registration Number 1014093 to this tower.

I declare under penalty of perjury that the foregoing statements and the attached Engineering Report, which was prepared by me or under my immediate supervision, are true and correct to the best of my knowledge and belief.

A handwritten signature in black ink, appearing to read 'K. T. Fisher', with a stylized flourish at the end.

KEVIN T. FISHER
