Re: Installation of Directional Antenna for WSUM(FM), Madison, WI

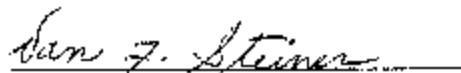

This letter is in response to Section 73.316 of the FCC Rules, which requires in the case of installation of a directional antenna for an FM broadcast station, a statement from a qualified engineer that the antenna has been installed pursuant to the manufacturer's instructions.

CERTIFICATION

I was present at the transmitter site during installation of the antenna in a supervisory capacity. I certify that the antenna was installed in accordance with the installation instructions supplied by Jampro Antennas, the manufacturer of the antenna (model JAHD-1/1), ID Number 10924.

QUALIFICATIONS

I have been in broadcasting since 1964 as a Contract Broadcast Media Licensee, a FCC license holder and certified by the SBE as a "Professional Broadcast Engineer". Presently I am a Broadcasting Media Specialist for the State of Wisconsin PBS Broadcast Stations. I have supervised and participated in the installation of all types of FM transmitting systems.
