File No. BNPL-20131112AWK**

Progress Update

Dear Madame Secretary:

On behalf of our client St. Joseph Radio, Inc., applicant for a construction permit for a new Low Power FM Station at Lewistown, Montana, this is to provide a 30 day progress report pursuant to the Commission's letter of May 15, 2014.

As previously noted, the applicant received a "determination of no hazard" for the proposed tower in the Federal Aviation Administration's ASR Study No. 2014-ANM-362-OE. It filed an amendment to the pending Form 318 application on July 3, 2014. In response to the amendment, the Audio Division staff informed the applicant that it had to obtain an antenna registration number, despite the fact that the FAA had not imposed any lighting or painting requirements.

On July 24, 2014, the applicant electronically filed an FCC Form 854 application for an antenna structure registration number. This application has been assigned the file number A0910059. Because of the new processing procedures for ASR numbers, we do not expect to receive such a number until sometime in September at the earliest.
