Re: Installation of Directional Antenna for WWSP(FM), Stevens Point, WI

This letter is in response to Section 73.316 of the FCC Rules, which requires, in the case of installation of a directional antenna for an FM broadcast station, a statement from a qualified engineer that the antenna has been installed pursuant to the manufacturer's instructions.

CERTIFICATION

I was present at the WWSP transmitter site during installation of the antenna in a supervisory capacity. I certify that the antenna was installed in accordance with the installation instructions supplied by Dielectric, the manufacturer of the antenna, model DCRH5ER, Proposal No. C-00693, Pattern 05A.

QUALIFICATIONS

I have more than 40 years experience in radio broadcast station design, installation and maintenance. I have supervised and participated in the installation of all types of FM transmitting systems.
