

**Engineering Statement
in support of an
Application for FM Translator
Channel Change Due to Displacement
and
Request for Waiver**

W296AX

Escanaba, MI

Board of Trustees of Northern Michigan University

Background

The Board of Trustees of Northern Michigan University (NMU) is the licensee of Non-Commercial (NCE) stations WNMU-FM (BLED-1511, Facility ID 49572), WNMU-TV and WNMU-DT, Marquette, MI. NMU also holds a license for translator W296AX at Escanaba, MI (BLFT-19980218TK, Facility ID 4262). W296AX (CH296, 107.1 MHz) is a vital link in bringing NMU educational programming to Escanaba. In March 2008, FM station WUPF-FM at Powers, MI (BLH-20080304AAD, Facility ID 164245), commenced broadcasting. WUPF-FM (CH297, 107.3 MHz) has notified NMU that W296AX is causing it interference and has requested that NMU change its frequency. Exhibit 1 (attached) shows that interference to WUPF-FM is predicted. WUPF-FM has consented to allow NMU to operate W296AX for a reasonable period of time until a new frequency can be found. An adjacent frequency is not available for W296AX to use where it is not predicted to cause interference to another full power FM station; therefore, NMU now wishes to apply for a change in frequency to 97.9 MHz (CH250) due to displacement^{1/} and respectfully requests a waiver of the Commission's Rules and Policies relating to major change applications and grant this application as a minor change.

^{1/} Section 74.1233(a) lists any frequency change, other than a change to the first, second or third adjacent channels, or intermediate frequency channels as a major change.

Station Parameters

Except for the change in frequency from CH296 to CH250 there are no proposed changes in the W296AX station parameters. The station parameters are listed below and include the proposed channel change.

The coordinates of the proposed site are:

45° 44' 43" N (NAD 27)
87° 03' 14" W

Proposed Frequency: 97.9 MHz (CH250)

Polarization: Horizontal

ERP: 0.031 kW

HAAT: 49m

RC AMSL: 241m

RC AGL: 58m

The antenna pattern and type (Scala CA-4 70° skew) remain the same. The antenna is mounted on top of a hotel that is 63m AGL in such a manner that it does not increase the overall height of the existing structure. The existing structure (hotel) does not pass the FCC's TOWAIR program.

Interference

An interference study that shows there is no predicted interference to other domestic or Canadian FM stations is included as Exhibit 2.

Request for Waiver

NMU has been providing Educational Programming to Escanaba through W296AX for many years. A new Full Service FM station (WUPF-FM) is now claiming that W296AX is interfering with it and requests that W296AX cease operation on CH296. NMU has searched for an adjacent frequency that would not cause interference to other Full Service FM stations or translators to no avail. Operation of W296AX on CH250 (97.9 MHz) is not predicted to cause interference to any other FM stations, domestic or Canadian, but such a change in frequency would be considered a major change. NMU requests a waiver of the Commission's Rules and Policies relating to major changes and allow W296AX to change its frequency from CH296 to CH250 as a minor change so that it may continue the Educational Programming it is providing to Escanaba.

Environmental & RFR

The proposed construction does not require preparation of an Environmental Assessment as it does not involve any of the factors listed in Section 1.1306.

The additional ground level RFR contributed to the site by this proposal in public areas is calculated to be 0.000012 mW/cm^2 which is less than 5% of the MPE for public exposure (0.2 mW/cm^2) at the proposed frequency and, therefore, the proposal is excluded from further consideration.

NMU agrees to comply with the Commission's requirements regarding power adjustments or cessation of operation as may be necessary to ensure a compliant environment for worker access. Workers will be encouraged to wear personal RFR monitors when on the structure. The tower base is enclosed by a locked security fence and appropriate signage warning of RFR hazards is posted.

Certification

I hereby certify that the foregoing report or statement was prepared by me but may include work performed by others under my supervision or direction. The statements of fact contained therein are believed to be true and correct based on personal knowledge, information and belief unless otherwise stated; with respect to facts not known of my own personal knowledge, I believe them to be true and correct based on their origin from sources known to me to be generally reliable and accurate. I have prepared this document with due care and in accordance with applicable standards of professional practice.

John F.X. Browne, P.E.
