

## EXHIBIT 11

This narrative exhibit is submitted to demonstrate that this proposal fully complies with the interference criteria set forth in Section 74.1204 of the Commission's rules. Attached at exhibit 12 are a spacing study, an additional narrative exhibit which includes a Section 74.1204(d) showing, and maps demonstrating clearly that there is no prohibited overlap between this proposal and any other FM services. The attached FM spacing study demonstrates that this proposal would be fully spaced even as a full power Class A FM station to all but three other FM facilities. The attached maps and Section 74.1204(d) study with regard to overlap between this proposal and the coverage contour of WWRR, Scranton, PA, demonstrate that there is no prohibited contour overlap between these three stations and the instant proposed FM translator facilities. Four currently operating FM translators and one proposed new FM translator have also been included on the maps because of their proximity to the proposed facilities. As demonstrated in these maps no prohibited overlap with these stations is predicted.

The eight facilities that have been included on the attached maps are: WNBT-FM, 104.5, Wellsboro, PA (54 dBu contour to proposed 34 dBu interference contour); WRFF, 104.5, Philadelphia, PA (54 dBu contour to prop. 34 dBu int. contour); WWRR, 104.9, Scranton, PA (60 dBu contours to prop. 100 dBu int. contour); Proposed Translator, 104.5, Jonestown, PA (60 dBu contour to prop. 40 dBu int. contour); Proposed Translator, 104.5, Jonestown, PA (40 dBu interference contour to prop. 60 dBu contour); W282BJ, 104.3, Scranton, PA (60 dBu contour to prop. 54 dBu int. contour); W280DY, 103.9, Wyoming, PA (60 dBu contour to prop. 100 dBu int. contour); W280CV, 103.9, Scranton, PA (60 dBu

contour to prop. 100 dBu int. contour); and W283AO, 104.5, Carbondale, PA (60 dBu contour to prop. 40 dBu int. contour).

W282BK 104.5 Tunkhannock, PA 74.1204(d) Narrative and its related exhibits are included to show allowable overlap under Section 74.1204(d) with this proposal's 100 dBu interference contour and the 60 dBu coverage contour of WWRR, Scranton, PA. A scale of kilometers has been included on the maps. These maps were drawn to scale using the rfSoftware series of computer programs.
