Notice to area hospitals and medical clinics

To whom it may concern:

This is a notice of Commencement of Digital Television (DTV) Operation. This letter contains information regarding potential interference to telemetry operation. Please ensure that all those who supervise clinical or biomedical engineering at your facility receive a copy of this notice and the associated information.

The rules of the Federal Communication Commission (codified at 47 CFR 15.242) have allowed certain biomedical telemetry devices to operate on unoccupied DTV channels on a secondary basis. If your facility uses biomedical telemetry devices that operate on frequencies within the television broadcast band the proper operation of such devices may be negatively affected by the new DTV operations in your area. This means that the medical facility or operator of such a device is responsible for resolving any interference problems that may arise once the area stations commence digital television broadcast service or, alternatively, must cease operation of affected devices.

The purpose of this notice is to provide you with the necessary information so that you may resolve potential problems. It may be advisable to discuss this with your technology supplier, especially if you believe that biomedical devices used in your facility are likely to malfunction due to our station's DTV operations. Due to the current transition, there will likely be an increase of digital broadcast signals operating in your area. Due to this situation, if you are planning to invest in new biomedical equipment, we would encourage you to consider purchasing equipment designed to operate on frequencies set aside for medical use as this could help you avoid unnecessary interference in its function.

The commencement date for digital broadcasting, the DTV channels, and the frequency bands for WBUP and WBKP are listed on the following page along with contact information for the individuals you may wish to speak with regarding any questions this raises for you. Any modifications following this notification will be available on our website at www.tv5and10.com. If you have any questions or needs that are not addressed in this notice please feel free to contact the station representatives listed on the following page.

Sincerely,

Gerry Heyn
Chief Engineer
WBKP/WBUP ABC 5&10

WBKP

Frequency Band: Channels 5-1 and 10-2
Effective Radiated Power: 6.887 kW
Antenna Location: Hwy M-26 1 Mi S, Painesdale, MI
