NEW FM RADIO STATION
SHIPROCK, NEW MEXICO
March 2006

TECHNICAL STATEMENT

1. This Technical Statement and attached exhibits were prepared on behalf of Winton Road Broadcasting Co., LLC ("WRB"), an applicant for a New FM station on Channel 299C1 at Shiprock, New Mexico (Auction #62).¹ WRB also has interests in KRTZ, Channel 254C, and KISZ-FM, Channel 250C, Cortez, Colorado; and KRWN, Channel 225C1, and KENN, 1390 kHz, Farmington, Colorado. The 3.16 mV/m contours of the proposed New FM station, KRTZ, KISZ-FM and KRWN overlap with one another and have a common area of overlap with the 5.0 mV/m contour of KENN. This results in WRB having attributable interests in four FM stations and one AM station in the same market. None of these stations are located in, nor considered "home" in any Arbitron market. Therefore, a revised contour overlap analysis is necessary. Exhibit #1 is a map depicting the subject stations.

2. A study, therefore, has been conducted to determine if ownership of these facilities complies with §73.3555 of the Commission's rules. The contours of the subject stations will be used to define the market boundary, hereinafter referred to as the "Radio Market". The study will determine the number of other commercial AM and FM stations (commercial and non-commercial) that either have transmitter sites within or provide coverage to the subject radio

1) WRB is also the licensee of KDGO, 1240 kHz, and KPTE, Channel 259C2, Durango, Colorado, and KVFC, 740 kHz, Cortez, Colorado. None of these stations have city grade overlap with the proposed New FM at Shiprock, New Mexico. Therefore, they are not considered further.

market. Only those stations with transmitter sites within 92.0 kilometers of the common area of overlap will be considered as contributors to the market. No other stations in which WRB has interests will be considered, unless it was a subject station in the market under review.

3. Exhibit #2 is a depiction of the stations within, or providing service, to the Radio Market boundary. A total of seventeen stations are depicted, including the five subject stations. Exhibit #3 is a tabulation of the stations in the Radio Market. The number of stations depicted falls in the fifteen to twenty-nine stations tier of §73.3555(a)(1)(iii) of the Commission's rules. At the fifteen to twenty-nine stations level, common ownership or control of up to six stations, with no more than four in the same service, is permissible. Based on WRB's interests in the above referenced stations, it is demonstrated herein that the proposed application for the New FM station at Shiprock, New Mexico is in compliance with the Commission's multiple ownership rules, as detailed in §73.3555 of the rules.

4. The foregoing technical statement was prepared on behalf of Winton Radio Broadcasting Co., LLC, by Graham Brock, Inc., its Technical Consultants. All information contained herein is true and accurate to the best of our belief and knowledge. All data relating to AM and FM facilities was extracted from the CDBS database. We assume no liability for errors or omissions in that database which may be adverse to the information contained herein.
