

RADIO/TELEVISION CROSS-OWNERSHIP

Currently, Tanana Valley Television Company is licensee of one Fairbanks full power television station and one Fairbanks radio station. It is applying to acquire another Fairbanks market radio station. Common ownership of a radio and television stations in the same market triggers the cross-ownership rule when either:

- (1) the Grade A contour of the television station encompasses the entire community of license of the radio station; or
- (2) the predicted or measured 2 mV/m contour of the AM station (1 mV/m contour for FM) encompasses the entire community of license of the television station.

Where such contour overlap exists, an entity may own varying combinations of stations depending upon the number of independent media voices in the market. Specifically, an entity may own, operate, or control:

- (1) up to 2 commercial television stations and 1 radio station, regardless of the number of media voices in the market;
- (2) up to 2 commercial television stations and 4 radio stations, if at least 10 independently owned media voices would remain in the market;
- (3) up to 2 commercial television stations and 6 radio stations (or 1 commercial television stations and 7 radio stations, to the extent that the entity could have owned the second television station), if at least 20 independently owned media voices would remain in the market.

Regarding the voice count tests set forth above, the Commission has stated that “voices” include:

- (1) all independently owned and operated full-power television stations (commercial and noncommercial) that are licensed to a community in the DMA in which the community of license of the television station in question is located;

- (2) all independently owned and operated radio stations (commercial and noncommercial) that are licensed to a community within the radio metro market (as defined by Arbitron) in which the television station is located, or the radio metro market in which the radio station(s) are located,¹
- (3) independently owned and operated radio stations that are licensed to a community outside the radio metro market that have a reportable ratings share within the metro market;
- (4) English-language newspapers that are published at least four days a week within the DMA in which the television station's community of license is located; and
- (5) cable.²

In this case, the 1 mV/m contour of Station KDJF encompasses 100% of Fairbanks, so the rule is triggered. See Figure 1. Tanana Valley complies with the rule because there are at least 10 independently owned media voices which will remain in the Fairbanks, Alaska market.

¹ Pursuant to § 73.3555©(3)(ii)(C), in areas where there is no radio metro market a party may count the radio stations present in an area that would be the functional equivalent of a radio market in order to determine how many media voices would remain in the market. To create "functionally equivalent" markets for this showing, the Assignee has counted those geographically proximate radio stations with a principal community contour that overlaps or intersects with the principal community contours of its owned stations.

² If cable is generally available, it is counted as one voice, regardless of the number of individual cable systems operating in the DMA.

Tanana Valley Television Company's Media Ownership³:

KFXF (TV), Fairbanks, AK
KYSC(FM), Fairbanks, AK
KDJF(FM), Ester, AK

Media Voices in Fairbanks:

Local Daily Newspaper – Fairbanks Daily News – Miner, Fairbanks, Alaska

Local Cable System – CGI Cable, Fairbanks, Alaska

Television Stations:

Fairbanks, AK (DMA #202)

CALL Sign	FCC ID Number	City of License	State of License	Licensee

KATN	13813	Fairbanks	AK	Smith Media License Holdings, LLC
KFXF	64597	Fairbanks	AK	Tanana Valley TV Company
KUAC-TV	69315	Fairbanks	AK	University of Alaska

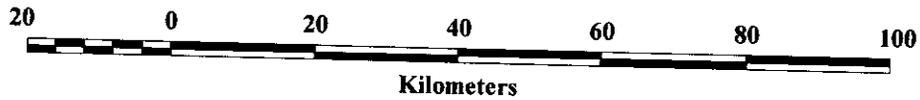

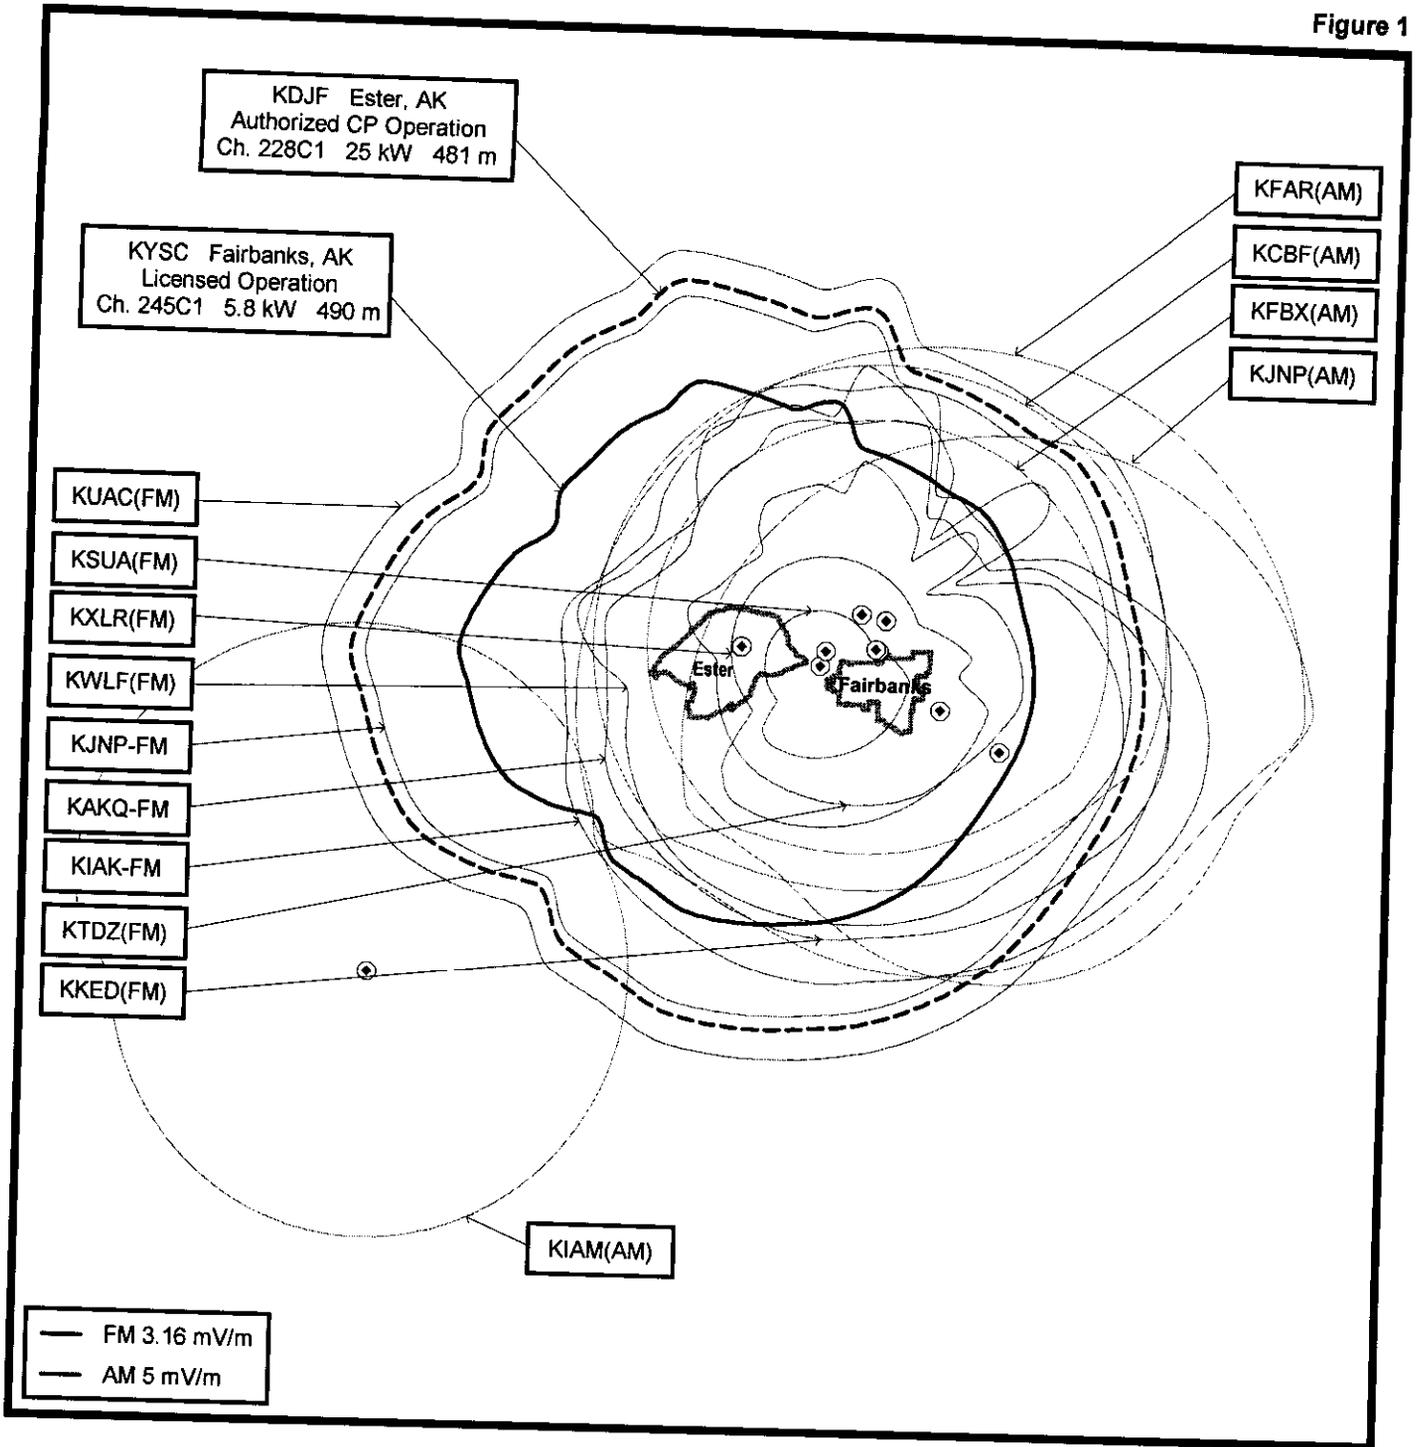

³ Assignee has created the functional equivalent of a radio market for the Fairbanks area because the Fairbanks radio stations do not belong to a defined Arbitron radio metro market. To do this, it has counted those geographically proximate radio stations with a principal community contour that overlaps or intersects with the principal community contours of the Tanana Valley radio stations.

⁴ The Commission, on November 29, 2007 granted an application to assign the license for Station KTVF(TV) to Newport Television, LLC (BALCT-20070504AFS).
