Re: WCIG antenna mounting

Dear Mr. Travis,

I, John M. Hennemuth PLS, of John R. Hennemuth Associates, Inc. have been employed by Family Life Ministries, Inc of Bath NY, to certify that the FM Antenna employed at WCIG, Dallas PA, has been constructed according to the manufacturer's specifications.

Being a licensed professional land surveyor in the State of Pennsylvania, I am certifying that the tower, located off of Bunker Hill Road, Town of Kingston, Luzerne County, State of Pennsylvania is indeed oriented with a face at 43 degrees clockwise from true north and that the antenna radiating elements are indeed mounted on that tower face in accordance to the manufacturer's specifications. Geographic co-ordinates for the tower location 41 deg 18 min 54 sec North latitude, and 75 deg 53 min 19 sec West longitude (NAD 27)

Respectfully,

John M. Hennemuth PLS
