

TECHNICAL STATEMENT
KDZA (FM) Facility ID No. 40848
Capstar TX Limited Partnership
RADIO MULTIPLE OWNERSHIP ANALYSIS

This statement and the attached figures were prepared on behalf of Capstar TX Limited Partnership("CTLP"), a licensee subsidiary of Clear Channel Communications, Inc. CTLP proposes to modify the facilities of KDZA(FM). A multiple ownership analysis was prepared considering the following radio stations under present or proposed common ownership or time brokerage:

Table 1: Proposed Commonly Owned or Controlled Stations Studied

Call Sign	Facility_id	City	State	Status
KOA	29738	DENVER	CO	LIC
KCSJ	53846	PUEBLO	CO	LIC
KGHF	53850	PUEBLO	CO	LIC
KVUU	35868	PUEBLO	CO	LIC
KCCY	40847	PUEBLO	CO	LIC
KCCY	40847	PUEBLO	CO	CP
KMOM	66669	FOUNTAIN	CO	LIC
KMOM	66669	FOUNTAIN	CO	APP
KKLI	67187	WIDEFIELD	CO	LIC
KDZA-PRP	40848	PUEBLO	CO	APP

Since certain of these stations have overlapping principal community contours (5 mV/m for AM stations, 3.16 mV/m for FM stations), an ownership study has been prepared in accordance with the Federal Communications Commission's multiple ownership rules¹.

CCBL does not have an attributable interest in any other station with a principal community contour that overlaps or intersects the proposed facility of KDZA(FM).

Radio Markets

The "radio market" applicable to common ownership of the subject stations is defined as the area encompassed by the mutually overlapping principal community contours of the proposed commonly owned stations. These mutually overlapping contours form one "radio markets", as shown in *Figure 1*, for analysis under the Commission's rules.

Radio Market is defined by the mutually overlapping principal community contours of KDZA(FM) (as proposed in the accompanying Form 301 application),

¹ See 47 C.F.R. § 73.3555.

KKLI(FM), KMOM(FM), KCCY(FM), KVUU(FM), KGHF(AM), KCSJ(AM), and KOA(AM) The predicted principal community contours of these stations (5 FM, 3 AM) are shown in *Figure 1*.

Count of Stations in Defined Markets

The number of radio stations in a "radio market" is determined by counting the operating, commercial stations having principal community contours that overlap or intersect the principal community contours that define the radio market, plus the subject commonly owned or controlled stations.

In Radio Market studied herein, there are over 45 radio stations, including the subject co-owned stations, that overlap or intersect with the defined "radio market." *Figure 3* is the tabulation of the radio stations identified in the market. (Stations currently owned by Clear Channel Communications, Inc. or its licensee subsidiaries are marked with an "*".)

Only known licensed, operating commercial stations were included in this tabulation. Distances to contours for AM stations were predicted using the antenna patterns as identified in the Commission's AM database and the appropriate Ground Wave Field Strength versus Distance Graph of 47 C.F.R. § 73.184. Ground conductivities were obtained from FCC Figure M3. Distances to the FM contours were determined based on the method of 47 C.F.R. § 73.313. Terrain data was derived from the N.G.D.C. 30 second computer database for each of the FM stations using radials spaced every 45 degrees of azimuth.

Based on the above, it is concluded that the proposed modifications comply with § 73.3555(a) of the FCC Rules.

Sincerely,

Troy G. Langham
FCC Engineering Specialist
Capstar TX Limited Partnership
