

**EXHIBIT 16-1**  
**NIGHTTIME ALLOCATION STUDY**

Attached as Exhibit 16-2 is a Nighttime Allocation Protection Report which shows that the proposed KKJY nighttime operation provides full protection to all existing and proposed facilities.

The greatest protection required is to KZRK, Canyon TX. At a nighttime operating power of 0.027 kilowatt, the proposed facility provides protection to KZRK with a small margin. All other AM stations are protected to a greater degree as shown in the study.
