

RADIO MARKET ANALYSIS
APEX BROADCASTING, INC.
KTSR RADIO STATION
DE QUINCY, LOUISIANA
May 2006

TECHNICAL STATEMENT

1. This technical statement and attached exhibits were prepared on behalf of Apex Broadcasting, Inc. ("Apex"), licensee of station KTSR, Channel 221C3, De Quincy, Louisiana. Apex is proposing to make minor changes in the facilities of KTSR by correcting the geographic coordinates. Apex is also the licensee of KNGT, Channel 258C1, Lake Charles, Louisiana¹; KHLA, Channel 225C2, Jennings, Louisiana; KJMH, Channel 298C2, Lake Arthur, Louisiana; and KLCL, 1470 kHz, Lake Charles, Louisiana.² KTSR, KNGT and KLCL are all licensed to communities within a metro county in the Lake Charles, Louisiana Arbitron Market (Market #229). KHLA and KJMH are considered "home" to the Lake Charles, Louisiana Market, but are licensed to communities in a non-metro county. As a result, a hybrid ownership analysis was conducted. The review will verify compliance of common ownership of metro stations in the same market under the Arbitron/BIA rated market rules, as well as a revised contour overlap study involving the non-metro stations.

ARBITRON/BIA MARKET REVIEW

2. As shown on Exhibit #1, there are sixteen AM and FM (commercial and non-commercial) stations listed in the Lake Charles, Louisiana Market. Apex would be in control of

-
- 1) There is also an outstanding construction permit for KNGT, which is considered in this instant review.
- 2) Apex is also the licensee of KJEF, 1290 kHz, Jennings, Louisiana. KJEF is not licensed to a community in a metro county nor does the corrected/proposed KTSR contour have a common area of overlap with KJEF. As such, KJEF is not considered a subject station for this review nor is it considered contributing station in the market.

three FM stations in the market. The number of stations indicated falls in the fifteen to twenty-nine stations tier of §73.3555(a)(1)(iii) of the Commission's rules. At this level, common ownership or control of up to six stations, with no more than four in the same service, is permissible. Therefore, control of KTSR, KNGT and KLCL in the Lake Charles, Louisiana Market is believed to be in compliance with the Commission's radio ownership rules for rated markets.

REVISED CONTOUR OVERLAP ANALYSIS

3. Since KHLA and KJMH are licensed to non-metro counties and have contour overlap with the other three Apex stations³, a study has been conducted to verify that the proposed application for KTSR is also in compliance with the Commission's multiple ownership rules. The city grade contours of these five stations are shown on Exhibit #2. As noted, the locations of the city grade contours of the stations create a distinct radio market.

4. The city grade contour KNGT encompasses most of the contours of KTSR, KLCL, KHLA and KJMH. Therefore the contour of KNGT will be used to determine the number of other stations in the market to which the subject stations will be added. No stations with transmitters located more than 92.0 kilometers from the boundary of the common overlap of subject stations will be considered. Further, no other facility controlled by Apex will be considered as a market contributor, unless it is a subject station in the radio market under study.

3) Including the KNGT CP.

5. Exhibit #3 is a depiction of the AM and FM stations (commercial and non-commercial) providing service to the Radio Market boundary. Exhibit #4 is a tabulation of the stations in the Radio Market. A total of sixteen stations are shown, including the five subject stations.⁴ The number of stations depicted falls in the fifteen to twenty-nine stations tier of 73.3555(a)(1)(iii) of the Commission's rules. At this level, common ownership or control of up to six stations, with no more than four in the same service, is permissible. Based on this number of facilities, it has been herein demonstrated that the non-rated Radio Market is in compliance with the Commission's rules.

6. Based on the individual compliance shown in the rated and non-rated markets, the minor change application for KTSR is in compliance with the Commission's rules.

7. The foregoing technical statement was prepared on behalf of Apex Broadcasting, Inc., by Graham Brock, Inc., its Technical Consultants. All information contained herein is true and accurate to the best of our belief and knowledge. All data relating to AM and FM facilities in the relevant BIA/Arbitron market was determined using the BIA Financial Network, Inc. Media Access Pro, Version 4.0. BIA database. Technical data related to AM and FM facilities was extracted from the Commissions CDBS database. We assume no liability for errors or omissions in either database which may be adverse to the information contained herein.

4) While there many are other stations contributing service to the market, they are not considered as there are sufficient stations based on the number of facilities to commonly held.
